	5. After region is selected, press SETUP to go back to the main screen.6. Bring the popcorn and enjoy.
Airis L103C	Hit 1 3 7 9. A menu comes up showing the firmware version. From this menu you can select the region with the numeric keypad. 0=region free, 1-6 selects that region.
Airis L120	Method 1:
	 turn on the dvd and wait for the no disc sign press eject type 9735 The menu will appear – Select "region" and change to REGION 0 then press enter press "exit setup" and then press enter. If after entering the code at step 3 the menu doesn't appear, try typing it again. The shitty remote is not very good at registering keystrokes (at least mine isn't!).
	Method 2:
	1-Turn on the DVD player. 2-Wait until the no disc message appear. 3-Insert via remote the code 9735. 4-The menu presentation appear in the tv. 5-Select the region 0. 6-Press enter. 7-Select exit menu. 8-Press enter.
Aiwa AVJ-R5	Method 1:
	step 1
	Go to this site

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	http://members.tripod.com/aiwaownersnetwork/pages/lg/5000_series_firmware.html
	And download the zip file. Extract the zip and burn the file onto a CD. Load the CD into the player and select region 0 Switch off and back on.
	step 2
	If when you then try and play a dvd (non region 2) it still says "check region code" then using your remote, press disply then disc menu then play in that sequence quite quickly. It honestly works! Because i'd alrady tried step one above, im not sure if you could just try step 2, might work without the software upgrade???
	Method 2:
	 insert disc wait for check region message press Display, Top menu, Play in quick succession If the above does not work, instead of "Top Menu" from step 3, do "Disk menu"
Aiwa AVJ-X55	This is a Firmware hack which will modify your Aiwa AVJ-X55 DVD Player:
	 Burn the folder 'RMTM0000' to a CD-R making sure that the directories stay in order. Insert the disk to your player Select desired region (0 for all regions)
	http://members.tripod.com/aiwaownersnetwork/pages/lg/lg5000.zip
	It says it is for the LG5000 but I have used this on my Aiwa AVJ-X55 and it worked.
Aiwa HT-DV1	For HT-DV1, you can use the closest model available on this URL http://www.dvd365.net/?hacks/hacklist.htm
	There will be no messages on the LCD screen but I have tried it and it worked perfectly. I changed my region 4 to "all region" using the above URL.
Aiwa HT-DV90	1. Press the DVD/CD button on the remote control 2. Press the Open button on the remote control to open the drive tray 3. Using the remote control, press the buttons C, 2, 5, 8, 0 and C 4. The word TESTMODE should appear on the DVD display, and the onscreen display should indicate the current region setting 5. Press the Up Arrow on your remote control until 14 02 is shown on the onscreen display. Note:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay

The 02 indicates the current region and may be different depending on what your player is currently set to

- 6. Using the remote control, press the buttons 1 and then 4, then enter 0 and 0 for multi-region, or 0 and 1 for region 1, or 0 and 2 for region 2, and so on
- 7. Press the Enter button on the remote control
- 8. Press the Return button on the remote control
- 9. The word TESTMODE should appear on the DVD display
- 10. Press the C button on your remote control
- 11. A message should be displayed stating EEP CLR followed by EEP ERR
- 12. Place your DVD in the drive tray
- 13. Press the Return button on the remote control

Aiwa HV-DH1

Method 1:

This is not a Firmware upgrade as such it is just using software to enable Multi Region, this was picked up from the Toshiba SD-42HK which must use the same hardware.

This works 100% on the Aiwa.

Go to this site

http://members.tripod.com/aiwaownersnetwork/pages/lg/5000_series_firmware.html

And download the zip file.

Extract the zip and burn the file onto a CD.

Load the CD into the player and select region 0

Switch off and back on.

Method 2:

AIWA HV-DH1

dvdvhs combination

Multi region hack

- 1. Go to www.area450.co.uk/images/lg5000.zip and download file.
- 2. Make a temp folder. Extract the contents into the folder you created using Win-Zip. It will create a folder called RMTM0000 plus a read me file.
- 3. Insert a blank CD-R and using Nero or other copying software (make data cd) Burn at 24x. Don't use direct cd and don't split up the RMTM0000 folder. (file only 5MB when unzipped) if you have done it right you will have a folder called RMTM0000 and read me file on cd. This is all you want.
- 4. Turn on your TV and DVD. Select station on your TV that you watch your dvds and videos on and make sure that dvd is selected on your Aiwa HV-DH1.
- 5. Insert the disk into the dvd player you just made, wait for about 20 to 30 seconds and a blue screen will appear with region management test mode. Using your remote press 0 for multi

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

region. Press ok, wait until disk tray opens, remove disk then power off. Turn back on after 10 seconds. 6. You can go back to the factory set region by pressing set up on the remote and going to TV Aspect, selecting 16:9 wide with green triangle at side and keying in the following numbers 1397139 then press enter, (ok button). This screen is system information and the region will show as the region your set was when you bought it (factory set). Press clear to exit or power off. You will have to repeat step 5 again if you want a multi region player. 7. This hack is 100% and still works after a power failure. Aiwa HV-DH10 Method 1: step 1 Go to this site http://members.tripod.com/aiwaownersnetwork/pages/lg/5000 series firmware.html And download the zip file. Extract the zip and burn the file onto a CD. Load the CD into the player and select region 0 Switch off and back on. step 2 If when you then try and play a dvd (non region 2) it still says "check region code" then using your remote, press disply then disc menu then play in that sequence quite quickly. It honestly works! Because i'd alrady tried step one above, im not sure if you could just try step 2, might work without the software upgrade ??? Method 2: 1. insert disc 2. wait for check region message 3. press Display, Top menu, Play in quick succession 4. If the above does not work, instead of "Top Menu" from step 3, do "Disk menu" Aiwa XD-AX36 1. Create a directory called RMTM0000 and a subdirectory in it called SCARLET 2. Create an empty file called KPJC19 1.DVD in this directory 3. Using a hex editor, edit the file KPJC19 1.DVD to contain four bytes in this order: 17 17 8C 00. Save changes to the file. Alternatively, download the file from http://www.math.uga.edu/~djb/html/kpjc19 1.dvd 4. Burn the directory RMTM0000/SCARLET containing the file KPJC19 1.DVD on a CD-R.

	2. 81328.3. Press button "Enter" for change region code(9 for multi-region playback).4. Press button "Stop"
Akai DV-R4000SS or DV-R4150SS	Power on with no disc in the tray 1.Press "setup" from remote control 2.Press "stop" from remote control 3.Press "5" "7" "0" "0" 4.Press "stop" from remote control 5.Press 0-9 for region No "0" for multizone 6.Press "setup' from remote control
Akai DVD-200BL	 Press the Open/Close button on your remote control Press the Setup button on your remote control Press the buttons 1, 3, 6 and 9, in order, one at a time, on your remote control Press the Left button on your remote control three times, in succession Press the Right button on your remote control You should now be in a setup menu. Select the Version option from the menu, then select the Region option. You can now change the region to 1 for region 1, 2 for region 2, and so on, or 0 for multiregion playback
Akai DVD-3850S	push the "open" button on the remote. push the number button" 8561" Use the direction button to choose the region code you want.
Akai DVDRW120	This is a Liteon LVW-5001. The changes are merely cosmetic. Download the firmware upgrade listed under the Liteon model, follow the install instructions, then you should be able to make it region-free, disable macro, and add a 3hr LP record option. Note: If you download the liteon firmware 5001 from the liteon sight. It will make your Akai a Lite on machine. It fixed my problem with the component out not working but only allows you to go region free with the code. You can not disable macrovision like you were before upgrading to the lite on firmware. And there is no 3 hour mode either with this upgrade.
Akai DVM-9500	To activete VCD and SVCD options you should change PROM settings. 1. turn on player 2. wait until it stops looking for cds. 3. press "pause" and "1","4","7","2" (screen with PROM settings should appear) 4. select 4th number by up or down (on top of screen you will see 4 7d or some thing like this on

the front panel will be the same)

In this number 8th bit is PAL/NTSC and 2nd VCD by default is OFF(=0)

- 5. presses "7" and "program", "5" on the screen will see 7E
- 6. press "enter" (settings will flash briefly)
- 7. VCD settings done

To activate SVCD

8. select 7th number in PROM settings. You will see some thing like 7 01

To activate SVCD you should change 5th bit.

- 9. press "1","1" you will see 7 11 on the screen
- 10. press "enter" screen will flash briefly
- 11. press "return"
- 12. turn player OFF
- 13. Settings are activated.

This may do region free also but I don't have any to try other than region 1

Akai DVPS-760

Method 1:

- 1. Open Disc Tray
- 2. Push "Setup" on remote control.
- 3. Push "91010" ("9" is the region code for all regions. You can substitute your region for 9 if you prefer.)
- 4. Push "Step," "Shuffle," and then "Next"
- 5. Close the Disc Tray.

to verify that the hack has worked:

- 1. Open Disc Tray
- 2. Push "Setup" on remote control.
- 3. Push "Shuffle," "Step, " and then "Next"

This takes you to the secret setup menu.

- 4. Scroll down to the "debug" setting and verify that the region you selected is selected here. Note that making changes directly to the menu here WILL NOT WORK!
- 5. Close the disc tray

Method 2:

Use the REMOTE to perform these operations:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	 2. press open 3. press prog 4. press enter 3 times 5. use up & down to select region 0 for region free 6. press stop to confirm
Alba DVD165	 turn on player press setup on remote press keys 2812 use up or down to select region for region free
Alba DVD45 or DVD50blk	1. Turn on your DVD player 2. Open disc tray either using the EJECT button on the Player or the OPEN button on the remote 3. Press 2812 4. A menu should pop up, press ENTER until 9 appears 5. Your DVD player is now region-free (you can play any countries DVD's) Method 2: 1. open Tray 2. press :33088 3. press 1 for region 1 (0 for all region) 4. then shut the draw hey presto it's multi region well at least it play's A NIGHTS TALE which is impressive as it is a RCE disc as well. 5. I have also found that if you use an R1 disc again it may not play it. 6. if this occur's turn it off then on again it seems to play them again with no problem's
Alba DVD55	1. pause, 2. press 3826210937 3. press 5 4. pause 5. enter 6. power
Alba DVD59	In a few easy steps you can turn your Alba DVD player into a multi-region capable machine; then you can enjoy DVDs from Amazon.com, Amazon.ca or even Amazon.co.jp. An NTSC capable television may be required to view DVDs purchased from outside the UK.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Power on the DVD player Press the "OPEN/CLOSE" button on the remote control once Press the "PROG" button once Press "ENTER" three times The region code will now show on the screen
	Press the "UP" and "DOWN" cursors to select region Selecting region "0" will make the DVD player region-free Press the "STOP" button to confirm setting
	Notes: the above code will turn your player into what is called "region-free". If you require the player to be a single region, for example region 1, then simply repeat the process and replace the "0" with a "1". This may be required if you have trouble playing DVDs purchased from outside the UK that have Region Code Enhancement technology on them. These titles are in a minority and you will find a substantial amount of titles will play without the need to change region. Our recommendation is that you set the player to region 0 and change to a specific region when the need arises.
Alba DVD65	1) Turn on 2) Open the cd tray 3) Press setup 4) Press left or right directional buttons to get to Preference page 5) Type 2812 which should automatically bring up the Region Code 6) Press Up or Down buttons to change the code. Mine showed as - Region code 0 Version AlbaDVD65V1.3
Alba DVD70	Don't need one - already multi region :)
Alba DVDP500	1. Turn on 2. open disc tray 3. enter this code: 2120090. Message displayed in top left corner should read 'Region Full'.
Alba TVD3450	1) Switch to DVD mode (TV) 2) Press Setup on remote 3) Press Next (one remote) 4 times to open version screen shows version2 on top right hand corner 4) Use arrow keys on remote control to change to 255 for region free

	Method 2:
	1. Turn Power on 2. Open Disc Tray 3. Press 349734 Then the region code required 0=region free
	Method 3:
	Region code hack posted May 3rd 2003: * Load your DVD in the tray * close the tray * As the DVD start to load the software press the button STEP in the remote several times. * Whoooa enjoy your DVD's from other regions. * You have full control of the remote control
Apex AD-1100W	Firmware upgrade:
	http://www.nerd-out.com/forum/viewtopic.php?t=19391
Apex AD-1100WB	http://www.nerd-out.com/forum/viewtopic.php?t=21985
	Here you'll find info and a download link for an "all-in-one" firmware hack which restores VCD functionality as well as region-free and macrovision hacks.
Apex AD-1130W	1. Insert the DVD. 2. Quickly press 1 multiple times until the DVD starts playing. 3. FF, Pause and RW will not work.
Apex AD-1165	 Choose the preferences in setup manual if you need to choose subtitle, etc. Put the DVD in and press "Title" button repeatly until it start playing the movie. Hit the "P/N" button on the remote to remove the "WRONG-REGION" remark on screen. When finish watch the DVD, hit eject to remove the DVD. The eject button is the only one remains responsive while playing wrong-region DVD.
Apex AD-1200	Method 1:
	1. Open tray 2. press 8 4 2 1 (you will see -'s appear top left of screen) 3. Menu appears for region and Macrovision 4. Use up/down keys to select Region/Macrovision 5. Use Enter to change region/Macrovision on/off 6. A PAL region 2 disk played fine when switched to region 9 (Really region 0, ie region-free)

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Method 2: 1. open the Disc tray leave it open 2. Next punch in 8421 on the remote... 3. now you see Region code put it to 9 (by "ENTER" not "9") Method 3: 1) originally had the 2.12 aa18 firmware 2) used the 8421 method successfully for region free 3) player needed repair. Sent to Apex 4) came back with 2.13 aa18 firmware. 8421 did not work. But with much better picture clarity. To check firmware version, press Display with a disk inside. Unfortunately, I did not verify the region status. 5) Tried a previously posted (now deleted) hack of: Setup - Video - Video - Auto(for choosing NTSC or PAL) - Setup. End of hack. But picture was scrambled so I put it back to NTSC. Region 5) Unplugged player to try to reset status. But when powered on again it was stil region free without the hack. Apex AD-1201 See post at http://www.nerd-out.com/forum/viewtopic.php?t=24451 for full info. If the firmware is AD1100-1 it can be flashed with firmware available at http://www.nerd-out.com/darrenk/1100W/1100W.htm Apex AD-1225 Go into the PREFERENCE SETUP menu and change the various options (i.e. AUDIO, SUBTITLE, etc.) to the settings that you desire. You won't be able to change these options once the disc starts playing. The "force" method is as follows: 1. Open the disc tray 2. Place your DVD on the tray. 3. Close the disc tray. 4. While you see the words "LOADING" on the screen, try pushing ONE of the following buttons repeatedly, very quickly: TITLE

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	1 2 3 4 5 6 7 8 9 5. If the trick works, the DVD will start playing, with the word WRONG REGION in the upper left corner. If the button you pushed does not work, repeat the process trying one of the other buttons on the list. To get rid of the WRONG REGION message, push the P/N button on the remote 3 times. (You will probably see the "Stop" symbol in the upper right corner after doing this - there's no known way to get rid of this symbol, but it's more bearable than WRONG REGION.) Besides P/N, the only other buttons that will function while the DVD is playing are: POWER Open/Close SETUP Arrow keys/ENTER (only when inside the setup menu) VOL+ VOL- MUTE In order to stop the DVD, you must push EJECT or turn off the Power.
Apex AD-1500	This is both a Region code hack and a macrovision hack. Instructions for applying these hacks are on the website.(not all Apex AD-1500's are applicable for this hack, tested on a version MD20-1,instructions for getting version are on http://www.nerd-out.com/darrenk/1500/1500_firmware.htm
Apex AD-2600	1. Open the Disc tray and leave it open for 30 seconds. 2. Press 3 3 0 8 in the Remote 3. Now the Region menu should appear 4. Turn it to region 9 and you are done
Apex AD-3201	1) open the DVD Tray 2) enter 8421 on the remote 3) Screen should show the Region and Macrovision Menu 4) enter region (9 is Region Free) 5) Select Macrovision On/Off 6) Close Tray to save.

	Press the Next button on your remote control You will now enter the hidden set-up page, and can change the player to any Region or set it to Region Free. You can also disable Macrovision from this menu
Apex AD-660	Firmware upgrade: http://www.nerd-out.com/darrenk/660/660patch.htm
Apex AD-700	Firmware upgrade: http://www.nerd-out.com/darrenk/700/700patch.htm
Apex AD-703	Method 1: Very easy to access loophole menus on this DVD. All u need is a CD burner and the firmware patch. I downloaded the patch from
	http://shincodvd.emuunlim.com/firmware.html All I did was download their patch, generate the ROM file, burn it to a CD, and presto! My Apex had menus to disable Macrovision and to change Region codes or better yet, turn off region checking altogether!
	Method 2: http://www.nerd-out.com/darrenk/Shinco/APEX703patch.htm
Apex AD-800	http://groups.yahoo.com/group/apex800/ Yahho! Group that has downloadable zip files of firmware that can be extracted and burned to cd to upgrade this DVD player to be region-free. Also has fireware to restore DVD to original condition. I have used the Hiteker 810 firmware upgrade and restored my player back without ANY problems. I don't have a DVD that's NOT Region 1 to test this, but I have no doubt that it will work. Remote WILL NOT function with this upgrade, but one is available from Radio Shack and program codes are also on the website. Must join Group to view files and messages, but this takes less that a minute. You can contact me if you have any questions. I just bought this player used and was looking for an owner's manual (also available on the site) when I found this Yahoo! Group.
Apex DRX-9000	 Turn machine on without putting a disc in. On the remote press 0086000. On the remote press SELECT. Turn the machine Off, then back On. It shall now allow Multi region play back.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

Apex GT2715DV	While the disc is loading, press repeatedly the "video/setup" button (setup screen will show on and off) until it is displayed a "DVD" label. Then press the "stop" button and then the "play" button and that's it. The hack is temporary. You will have to do this every time you want to see a new DVD with a region different to 1.
Apex HT-170	-Open the tray and place your DVD from a different region than 1 -When closing the tray start pushing "3" fast and several times -Open and close the tray again -When closing the tray start pushing "step" fast and several times -Now all the buttons in the remote control are available so you can watch your DVD
Apex PD-10	place region 2 disc in whilst loading with remote key in 8 4 2 1 then keep pressing 1 screen goes black then back to dvd advert screen press play on unit it should play but sound very low
Apex PD-100	 Method 1: Open the player's tray. Using the remote control, key in the following: 8, 4, 2, 1. A hidden menu will appear. You may need to put a DVD into the player and then perform part 2 of the hack. The player may flash "wrong region code" before playing. Method 2: Put the region 2 DVD into the player (this player I assume is R1 by default). Wait for the "Regional Code Violation" message to disappear. Press 2 on the remote control. The player will say "Wrong Region Code", then start the movie at a random point. Press Menu on the remote control, then the message disappears.
Apex PD-510	By pressing '1' repeatedly during boot with a Region-2 DVD will allow the PD-510 to play. After that the buttons on the player AND the remote are useless until you eject the disc. Wrong region also shows in the top left corner of the screen, to remove this move the PAL/NTSC switch to PAL and back to NTSC and it goes away, now all that is left is a stop sign in the top right corner.
Arcam DV78	Method 1: Press the Open button on the remote control to open the drive tray Press button 1 four times

Aspire Digital AD- N820B	 press the open/close button to open the tray; press the setup button to go to the setup screen; press the right-arrow button until you reach the preferences section of the setup screen; press the 1 3 8 9 keys in that order; a region picker will appear; press the up/down arrow keys to pick a region; press the play button to dismiss the region picker. I've used this hack about five times to switch between regions 0, 1, and 2. So far it works great! Note that this player is probably the same as the Sumvision N820, so this hack will probably work on the Sumvision as well. Also note that the TV type setting on the device is set to "Auto/Multisync" by default instead of NTSC. I've noticed some reports of video problems with new players right out of the box, and that might be why, since most Americans don't have TVs that can do Multisync. If you have such problems, try switching the setting from "Auto" to "NTSC". The setting doesn't affect what kind of DVDs you can play, just how they get output to the TV.
Astar PD-3020	Already region free
Atacom DV967	With the remote control make it region free Setup, 1, 3, 7, 9. select 0
Audiologic DVD-101	Eject the tray

Bellagio AD-2020	Overview
	This page lists the most popular remote control "hack" sequences which enable owners to change the factory region code setting to either another region, or to all-region playback. This list only relates to those DVD players which have a MediaTek MT1369, MT1379 or MT1389 chipset installed.
	(To check your player's chipset see our advice page here - coming soon).
	Please note that this list is not exhaustive, and lists those hacks which are known to work on at least one player, if not more.
	The hacks are divided into three categories :
	those featuring a "1369" number sequence in the hack (generally MT1369 players) - click here those featuring a "1379" number sequence in the hack (generally MT1379 players) - click here other sequences - click here
	For a 5-page printable list of all of these hacks, which gives the information in black type on a white background with an instruction button to print the page, please click here.
	"1369" type remote control region code hacks
	These hacks are generally related to players with MediaTek MT1369 chips, although they have been known to work on players with MT1379 chips too.
	The relevant buttons to push on the remote control are noted in these four hacks:
	Hack 1 Press the OPEN/CLOSE button once, so that the tray on your player ejects Press the SETUP button once Key in 1, then 3, then 6, then 9 (i.e. 1369) Press the left arrow button (the one marked
	Press the right arrow button (the one marked >) once A new menu called VERSION should now appear at the bottom of the set up menu Use the down arrow button to highlight the VERSION menu Press the PLAY button once
	You should now see the region code and be able to use the left and right arrow buttons to change the setting: 0 is for all-region, 1 to 6 each of the individual regions

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 2 Press the OPEN/CLOSE button once, so that the tray on your player ejects Press the SETUP button once

Key in 1, then 3, then 6, then 9, then 8, then 8, then 8 then 8 (i.e. 13698888)

Press the left arrow button (the one marked

Press the right arrow button (the one marked >) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

You should now see the region code and be able to use the left and right arrow buttons to change

the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 3 Press the OPEN/CLOSE button once, so that the tray on your player ejectsPress the SETUP button once

Key in 1, then 3, then 6, then 9, then 8, then 8, then 8 then 8 (i.e. 13698888)

Press the next chapter button (the one marked >>1) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

You should now see the region code and be able to use the left and right arrow buttons to change

the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 4 - newer players are known to respond to this hack Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the CLEAR button once

Key in 1, then 3, then 6, then 9, followed by the new region number, between 0-6 (eg all regions -

key in 13690; just region 1 - key in 13691; just region 2 - key in 13692, etc)

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

"1379" type remote control region code hacks

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

These hacks are related to players with MediaTek MT1379 chips. Note that in some cases below the region code will be displayed but it is not possible to alter the code. Please see our article here if this situation occurs.

The relevant buttons to push on the remote control are noted in each of the sequences below. Note that there are considerable similarities with the hack sequences noted for "1369" hacks above.

Hack 5 Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Key in 1, then 3, then 7, then 9 (i.e. 1379)

Press the left arrow button (the one marked

Press the right arrow button (the one marked >) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

You should now see the region code and be able to use the left and right arrow buttons to change

the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 6 Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Key in 1, then 3, then 7, then 9, then 8, then 8, then 8 then 8 (i.e. 13798888)

Press the left arrow button (the one marked

Press the right arrow button (the one marked >) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

You should now see the region code and be able to use the left and right arrow buttons to change

the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 7 Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Key in 1, then 3, then 7, then 9 (i.e. 1379)

Press the next chapter button (the one marked >>1) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

You should now see the region code and be able to use the left and right arrow buttons to change the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 8 Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Key in 1, then 3, then 7, then 9, then 8, then 8, then 8 then 8 (i.e. 13798888)

Press the next chapter button (the one marked >>1) once

A new menu called VERSION should now appear at the bottom of the set up menu

Use the down arrow button to highlight the VERSION menu

Press the PLAY button once

You should now see the region code and be able to use the left and right arrow buttons to change

the setting: 0 is for all-region, 1 to 6 each of the individual regions

Once altered press the SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 9 - newer players react to this hack Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the CLEAR button once

Key in 1, then 3, then 7, then 9, followed by the new region number, between 0-6 (eg all regions - key in 13790; just region 1 - key in 13791; just region 2 - key in 13792, etc)

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 10 - newer players react to this hack Press the OPEN/CLOSE button once, so that the tray on your player ejects

Key in 1, then 3, then 7, then 9, followed by the new region number, between 0-6 (eg all regions - key in 13790; just region 1 - key in 13791; just region 2 - key in 13792, etc)

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 11 - this is the hack that often fails to work on players with newer Type 2 OSDs Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Press the right arrow button (the one marked >) three times, so that the PREFERENCES menu icon is highlighted (it's the icon to the left of the padlock icon)

Key in 1, then 3, then 7, then 9 (i.e. 1379)

Current REGION CODE will pop up on screen, possibly with additional information shown too You may be able to use the left and right arrow buttons to change the setting: 0 is for all-region, 1 to 6 each of the individual regions. Please note you may find you are unable to change this region

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

code - this is a known fault : please see our article here

If you are able to change the region code, press SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 12 - this is the newest hack for Type 2 OSDs Press the OPEN/CLOSE button once, so that the tray on your player ejects

Press the SETUP button once

Press the right arrow button (the one marked >) three times, so that the PREFERENCES menu icon is highlighted (it's the icon to the left of the padlock icon)

Key in 1, then 3, then 7, then 9, then 1, then 1, then 0, then 0 (i.e. 13791100)

Current REGION CODE will pop up on screen, possibly with additional information shown too You can use the left and right arrow buttons to change the setting: 0 is for all-region, 1 to 6 each of the individual regions.

Press SETUP button again

The region code will now have been changed on your DVD player

You may now press the OPEN/CLOSE button again, to close the tray

Hack 13 - this one works on TV/DVD combi units Press the DVD function on your TV set Press the DVD mode button on the remote control

Press SETUP on the remote control

Key in 1, then 3, then 7 then 9 (i.e. 1379)

Now select the region you require 0 - 9

Hack 14 - this one works on TV/DVD combi units Press the DVD function on your TV set Press the DVD mode button on the remote control

Press SETUP on the remote control

Key in 1, then 3, then 7 then 9 (i.e. 1379)

You can use the left and right arrow buttons to change the setting : 0 is for all-region, 1 to 6 each of the individual regions.

Press SETUP button again

The region code will now have been changed on your DVD player

Other remote control region code hacks known to work on some MediaTek players

The vast majority of these (hacks 13 to 17) use the "8888" number sequence - there are subtle differences between these hacks, such as the order the keys are pressed. They may look identical, but take care - they are different!

The remainder of the remote control number sequences seem to relate to other chipsets, and presumably were retained at the request of manufacturers switching over to using MediaTek for the first time.

Bluesky 100	

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

This player is equal to all of these players:

SEG Hollywoos2/BeverlyHills/LasVegas/LosAngeles, Centrum Libra/C100/Gemini, Universum 8120, Metz DG71/DH71, Vestel 2210/2216/2300, Bluesky 100/2210, Roadstar 2031H They only differ in whether the analogue 5.1 audio plugs are present or not. Al well, some come

with a different case. However, all of them run with the same operating software.

In order to update your player with a new and patched firmware (codefree, mactovision free), you first have to make sure what chipset and maybe what mainboard version there is.

The info screen tells you the chipset: press (open) (menu) (7) (4) (2) (0). This brings up the info screen tellung you the firmware version etc, what looks like this:

Player Version: STCinemaster 3.388 - Vestel 3.06b9 Driver Version: 401, Build 706-Configurable-1

Region Code: Configurable, All

Drive Type: Type 0-ATAPI, DVS-LDRDSL-710A, LT37

Memory Config: 8192KB SMI, 0KB EMI, 5519

Audio DAC: CS4335-3

Chipset:

Main decoder chip: Take a look at the line 'Memory Config' and look at the end of the line. This tells you whether your player works with the 5508 chip or the 5519 (like shown above).

Audio DAC chip: Take a look at the last line. It tells you the name of the chip, in this case it's the 'CS4335' and how many of them are present. '-3' means that there are 3 of them (that's the case for my 5.1 player with 3 stereo(2-channel)-Audio DACs which makes 6 channels).

Drive Type: Look at that line. It should be an ATAPI device anyway. Almost every player around comes with a DVS drive 'DSL-710A'. The drive's firmware (not that one of the dvd player) is shown at the end of the line. Here, it's 'LT 3.7'.

If the menu shows 5508 for the chipset (or it doesn't show 5519), then it's bad luck for now. There's no new firmware available for the time being.

If it shows 5519, then you may have either a mainboard maked '12MB03' (older players) or '12MB04' (all the recently manufactured). You may open you dvd player case and look for yourself or just try the update: if you've got massive picture problems, it was a 12mb03 and you have to modify the firmware before you try the update again.

(The version information is printed on the mainboard on right side near the big chip (plugs facing backwards). It may be hidden partly under a label, but you most likely see the '04' (in case it's a 12MB04).)

Mainboard 12MB04:

Just downoad the latest firmware version for 'SEG BeverlyHills2' from this page: www.veseg.de. Then download the latest version of the tool abconf from www.powerglitch.com.

Unpack the firmware to a separate folder. You may have to remove the write protection for the

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

file 'hws.ab'.

Start abconf. Press load and select the requested files of those you've just unpacked.

Now you can apply the modifications:

AudioDAC:

select the right audio DAC type:

AUDIO/dac/{'cs4335' or whatever your player has, see above}

then the right count of DAC chips:

(just choose it on the Audio DAC shortcut on the right, or do it manually by changing the entry ba hand:)

AUDIO/dacnum/{'1' or '3' or whatever you have seen on the info screen, see above}

RegionCode:

GENERAL/region/{mark the current setting and click the right butten. Then change the value to '0' for codefree}

Macrovision:

(just choose disable on the macrovision shortcut on the right, or do it manually by changing the entry ba hand:)

VIDEO/macrovision/{click on 'disable'}

Misc:

Enable audio output during fast-forward/rewind of cd audio and mp3 playback: NAVI/CDDA/audioscan/{select 'enable'} NAVI/MP3/audioscan/{select 'enable'}

then, click save and burn the files to a cd-r/-rw. Note that you may have to add a junk data file of about 40..50MB (e.g. any 'song.wav'). This may be necessary because some drives do have problems with an otherwise too narrow data track.

Bluesky 2210S

This player is equal to all of these players:

SEG Hollywoos2/BeverlyHills/LasVegas/LosAngeles, Centrum Libra/C100/Gemini, Universum 8120, Metz DG71/DH71, Vestel 2210/2216/2300, Bluesky 100/2210, Roadstar 2031H They only differ in whether the analogue 5.1 audio plugs are present or not. Al well, some come with a different case. However, all of them run with the same operating software.

In order to update your player with a new and patched firmware (codefree, mactovision free), you first have to make sure what chipset and maybe what mainboard version there is.

The info screen tells you the chipset: press (open) (menu) (7) (4) (2) (0). This brings up the info screen tellung you the firmware version etc, what looks like this:

Player Version: STCinemaster 3.388 - Vestel 3.06b9 Driver Version: 401, Build 706-Configurable-1

Region Code: Configurable, All

Drive Type: Type 0-ATAPI, DVS-LDRDSL-710A, LT37

Memory Config: 8192KB SMI, 0KB EMI, 5519

Audio DAC: CS4335-3

Chipset:

Main decoder chip: Take a look at the line 'Memory Config' and look at the end of the line. This tells you whether your player works with the 5508 chip or the 5519 (like shown above).

Audio DAC chip: Take a look at the last line. It tells you the name of the chip, in this case it's the 'CS4335' and how many of them are present. '-3' means that there are 3 of them (that's the case for my 5.1 player with 3 stereo(2-channel)-Audio DACs which makes 6 channels).

Drive Type: Look at that line. It should be an ATAPI device anyway. Almost every player around comes with a DVS drive 'DSL-710A'. The drive's firmware (not that one of the dvd player) is shown at the end of the line. Here, it's 'LT 3.7'.

If the menu shows 5508 for the chipset (or it doesn't show 5519), then it's bad luck for now. There's no new firmware available for the time being.

If it shows 5519, then you may have either a mainboard maked '12MB03' (older players) or '12MB04' (all the recently manufactured). You may open you dvd player case and look for yourself or just try the update: if you've got massive picture problems, it was a 12mb03 and you have to modify the firmware before you try the update again.

(The version information is printed on the mainboard on right side near the big chip (plugs facing backwards). It may be hidden partly under a label, but you most likely see the '04' (in case it's a 12MB04).)

Mainboard 12MB04:

Just downoad the latest firmware version for 'SEG BeverlyHills2' from this page: www.veseg.de. Then download the latest version of the tool abconf from www.powerglitch.com.

Unpack the firmware to a separate folder. You may have to remove the write protection for the file 'hws.ab'.

Start abconf. Press load and select the requested files of those you've just unpacked.

Now you can apply the modifications:

AudioDAC:

select the right audio DAC type:

AUDIO/dac/{'cs4335' or whatever your player has, see above}

then the right count of DAC chips:

(just choose it on the Audio DAC shortcut on the right, or do it manually by changing the entry ba hand:)

AUDIO/dacnum/{'1' or '3' or whatever you have seen on the info screen, see above}

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

RegionCode:
GENERAL/region/{mark the current setting and click the right butten. Then change the value to
'0' for codefree}

Macrovision:

(just choose disable on the macrovision shortcut on the right, or do it manually by changing the entry ba hand:)

VIDEO/macrovision/{click on 'disable'}

Misc:

Enable audio output during fast-forward/rewind of cd audio and mp3 playback: NAVI/CDDA/audioscan/{select 'enable'} NAVI/MP3/audioscan/{select 'enable'}

then, click save and burn the files to a cd-r/-rw. Note that you may have to add a junk data file of about 40..50MB (e.g. any 'song.wav'). This may be necessary because some drives do have problems with an otherwise too narrow data track.

Bluesky DS-2300

Method 1:

turn on the dvd wait untill the no cd message and pres 7,7 and select ... a secret menu will appear

Method 2:

To know which region is using now:

- 1. On
- 2. Menu
- 3. 1,3,5,7

It shows you actual config and region configured now

To multizone it switch off and:

- 1. On
- 2. Eject (open the tray)
- 3. Display
- [3. 1, 1, 1, 1 (push four times '1')

To this point you ll get no message now:

- 4. Select
- 5. Region code, 0 (zero) for multiregion or 2 european or whatever.

when you push 0 dydplayer will show you SET OK

Turn off and see the new region with first code

Bluesky DS-8315

Method 1:

- 1 Open the drawer of the reader via the remote control
- 2 Press successively keys 8, 4, 2, and 1

	Track -<
Cello DVD8105	Turn on Open the tray Press Setup Select Perference menu Enter 1379 Choose your area (O = multiregion)
Centrum DVD-C100	This player is equal to all of these players: SEG Hollywoos2/BeverlyHills/LasVegas/LosAngeles, Centrum Libra/C100/Gemini, Universum 8120, Metz DG71/DH71, Vestel 2210/2216/2300, Bluesky 100/2210, Roadstar 2031H They only differ in whether the analogue 5.1 audio plugs are present or not. Al well, some come with a different case. However, all of them run with the same operating software. In order to update your player with a new and patched firmware (codefree, mactovision free), you first have to make sure what chipset and maybe what mainboard version there is. The info screen tells you the chipset: press (open) (menu) (7) (4) (2) (0). This brings up the info
	screen tellung you the firmware version etc, what looks like this:
	Chipset: Main decoder chip: Take a look at the line 'Memory Config' and look at the end of the line. This tells you whether your player works with the 5508 chip or the 5519 (like shown above). Audio DAC chip: Take a look at the last line. It tells you the name of the chip, in this case it's the 'CS4335' and how many of them are present. '-3' means that there are 3 of them (that's the case for my 5.1 player with 3 stereo(2-channel)-Audio DACs which makes 6 channels). Drive Type: Look at that line. It should be an ATAPI device anyway. Almost every player around comes with a DVS drive 'DSL-710A'. The drive's firmware (not that one of the dvd player) is shown at the end of the line. Here, it's 'LT 3.7'.
	If the menu shows 5508 for the chipset (or it doesn't show 5519), then it's bad luck for now. There's no new firmware available for the time being. If it shows 5519, then you may have either a mainboard maked '12MB03' (older players) or '12MB04' (all the recently manufactured). You may open you dvd player case and look for yourself or just try the update: if you've got massive picture problems, it was a 12mb03 and you

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

have to modify the firmware before you try the update again.

(The version information is printed on the mainboard on right side near the big chip (plugs facing backwards). It may be hidden partly under a label, but you most likely see the '04' (in case it's a 12MB04).)

Mainboard 12MB04:

Just downoad the latest firmware version for 'SEG BeverlyHills2' from this page: www.veseg.de. Then download the latest version of the tool abconf from www.powerglitch.com.

Unpack the firmware to a separate folder. You may have to remove the write protection for the file 'hws.ab'.

Start abconf. Press load and select the requested files of those you've just unpacked.

Now you can apply the modifications:

AudioDAC:

select the right audio DAC type:

AUDIO/dac/{'cs4335' or whatever your player has, see above}

then the right count of DAC chips:

(just choose it on the Audio DAC shortcut on the right, or do it manually by changing the entry ba hand:)

AUDIO/dacnum/{'1' or '3' or whatever you have seen on the info screen, see above}

RegionCode:

GENERAL/region/{mark the current setting and click the right butten. Then change the value to '0' for codefree}

Macrovision:

(just choose disable on the macrovision shortcut on the right, or do it manually by changing the entry ba hand:)

VIDEO/macrovision/{click on 'disable'}

Misc:

Enable audio output during fast-forward/rewind of cd audio and mp3 playback:

NAVI/CDDA/audioscan/{select 'enable'}NAVI/MP3/audioscan/{select 'enable'}

then, click save and burn the files to a cd-r/-rw. Note that you may have to add a junk data file of about 40..50MB (e.g. any 'song.wav'). This may be neccessary because some drives do have problems with an otherwise too narrow data track.

Centrum Libra

This player is equal to all of these players:

SEG Hollywoos2/BeverlyHills/LasVegas/LosAngeles, Centrum Libra/C100/Gemini, Universum 8120, Metz DG71/DH71, Vestel 2210/2216/2300, Bluesky 100/2210, Roadstar 2031H They only differ in whether the analogue 5.1 audio plugs are present or not. Al well, some come

with a different case. However, all of them run with the same operating software.

In order to update your player with a new and patched firmware (codefree, mactovision free), you first have to make sure what chipset and maybe what mainboard version there is.

The info screen tells you the chipset: press (open) (menu) (7) (4) (2) (0). This brings up the info screen tellung you the firmware version etc, what looks like this:

Player Version: STCinemaster 3.388 - Vestel 3.06b9 Driver Version: 401, Build 706-Configurable-1

Region Code: Configurable, All

Drive Type: Type 0-ATAPI, DVS-LDRDSL-710A, LT37

Memory Config: 8192KB SMI, 0KB EMI, 5519

Audio DAC: CS4335-3

Chipset:

Main decoder chip: Take a look at the line 'Memory Config' and look at the end of the line. This tells you whether your player works with the 5508 chip or the 5519 (like shown above).

Audio DAC chip: Take a look at the last line. It tells you the name of the chip, in this case it's the 'CS4335' and how many of them are present. '-3' means that there are 3 of them (that's the case for my 5.1 player with 3 stereo(2-channel)-Audio DACs which makes 6 channels).

Drive Type: Look at that line. It should be an ATAPI device anyway. Almost every player around comes with a DVS drive 'DSL-710A'. The drive's firmware (not that one of the dvd player) is shown at the end of the line. Here, it's 'LT 3.7'.

If the menu shows 5508 for the chipset (or it doesn't show 5519), then it's bad luck for now. There's no new firmware available for the time being.

If it shows 5519, then you may have either a mainboard maked '12MB03' (older players) or '12MB04' (all the recently manufactured). You may open you dvd player case and look for yourself or just try the update: if you've got massive picture problems, it was a 12mb03 and you have to modify the firmware before you try the update again.

(The version information is printed on the mainboard on right side near the big chip (plugs facing backwards). It may be hidden partly under a label, but you most likely see the '04' (in case it's a 12MB04).)

Mainboard 12MB04:

Just downoad the latest firmware version for 'SEG BeverlyHills2' from this page: www.veseg.de. Then download the latest version of the tool abconf from www.powerglitch.com.

Unpack the firmware to a separate folder. You may have to remove the write protection for the file 'hws.ab'.

Start abconf. Press load and select the requested files of those you've just unpacked.

Now you can apply the modifications:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	AudioDAC: select the right audio DAC type: AUDIO/dac/{'cs4335' or whatever your player has, see above} then the right count of DAC chips: (just choose it on the Audio DAC shortcut on the right, or do it manually by changing the entry ba hand:) AUDIO/dacnum/{'1' or '3' or whatever you have seen on the info screen, see above} Region code: GENERAL/region/{mark the current setting and click the right butten. Then change the value to '0' for codefree} Macrovision: (just choose disable on the macrovision shortcut on the right, or do it manually by changing the entry ba hand:) VIDEO/macrovision/{click on 'disable'} Misc: Enable audio output during fast-forward/rewind of cd audio and mp3 playback: NAVI/CDDA/audioscan/{select 'enable'} NAVI/MP3/audioscan/{select 'enable'} then, click save and burn the files to a cd-r/-rw. Note that you may have to add a junk data file of about 4050MB (e.g. any 'song.wav'). This may be neccessary because some drives do have problems with an otherwise too narrow data track.
Centrum Xamba 300	1: Push Open/Close 2: Enter 3,2,1 3: Push Edit 4: Use Arrows To Select Region
Centrum Xamba 500	1. Press "Open/Close" button. 2. Press and hold the "Zoom" button for 2 seconds. 3. Press the button "7", "2", "0", "0". 4. Press "Enter". 5. Use the arrow keys to change the region to 0 (multi-region). 6. Press "Enter" to save your settings.
CGV AX-201	1 - Switch on DVD player and do following (with remote controle) 2 - Open slide with EJECT key 3 - Enter one of the following code (depend on version) 77 or

	regio.coay.com/ws/cbay15A11.dn; viewschersotheritems&uschu-best.scher_1
	5. select the region code using the remote (set it to ALL)
	6. confirm it, using enter
	7. leave the menu using the return button on your remote
	8. close the tray
	Method 2:
	1. Turn on the DVD player.
	2. Open the tray.
	3. Enter 2 0 1 1 (no menu will pop up)
	4. Enter the region number you'd like to use (0 for region-free)
	5. "SET OK" will appear onscreen if the code worked properly.
	For clairtone CLDVD105T
	- turn on your DVD player
	- open the tray
	- on the remote, press INTRO
	- press on the remote: 2,0,1,1
	- press 0 for region free, 1 for region 1, 2 for region 2 etc
	- you will see on screen "SET OK"
	this will hack your DVD player temporarily, you have to repeat the procedure each time you want to watch a movie
	Method 3:
	- turn on your DVD player
	- open the tray < pay attention, tray MUST be open
	- on the remote, press INTRO (green button at the bottom)
	- press on the remote : 2,0,1,1 < Do this SLOWLY, like 1-2 second pause between numbers,
	otherwise it doesnt get the code)
	- Its still not going to give you any confirmation yet, so don't expect a menu or anything
	- press 0 for region free, 1 for region 1, 2 for region 2 etc
	- you will see on screen "SET OK" <- this is the only confirmation you get
Clas Ohlson	Turn on the dvd and the tv.
DVD/DivX	Press "open".
2 , 2, 21, 11	Then punch in: 1-0-3-0-0
	The TV-screen should now read "Region: 0"

Classic DVD102

Method 1:

Turn on the DVD player, if there is a DVD in the player, completely stop the DVD from playing (usually stop twice). Press the Setup button, then Volume +, Volume -, Volume +, Volume - After you do that, it will close the setup menu, and in the Top Right of the SCreen, it will say VER * Use the left and right buttons on the remote (by the select / play key) to select a region. VER 1 = Region 1, VER 2 = region 2

Also, you can select Version 255 which is region autoselect (though it may be code free, i don't know).

Then you press setup twice, and insert the disc. It should work like that.

Method 2:

SETUP

Volume +

Volume -

Volume +

Volume -

You should see VER x in the upper right hand corner (x is your region). Use right and left cursor keys to select the region you want, 1-6. 255 will read all regions.

Method 3:

Ensure no CD in drive, or press STOP twice to stop anything playing.

On remote press SETUP and then NEXT PREV NEXT PREV

This will get to a VER menu top right. Region 255 is region free. Use left/right keys to change. If, in this menu, you press the UP or DOWN button then the VER menu will change to 3001 or 4001. When it says 4001 press the right arrow and it changes to 4000. This _appears_ to disable macrovision. I tried a quick test recording and with it at 4001 then it failed to record, but when at 4000 then it recorded OK.

Classic DVD103

Method 1:

TRAY OUT IN STOP MODE

PRESS SETUP KEY

PRESS NEXT

PRESS PREVIOUS

PRESS NEXT

Press Menu	Coby DVD-215	Method 1:
		Press Menu

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Press 1, 9 Menu appears Select region by pressing PLAY Change the region to (?) Press PLAY Press door open and close Power off Method 2: Open tray Press 2 8 1 2 Select region by pressing PLAY button on remote
Coby DVD-218	with no disk in the player press: Setup, Vol+, Vol-, Vol+, Vol- in the right upper corner a current region code would appear. You could switch between 1,2,3,4,5,6 or 255 using Right and Left buttons. I beleive, 255 is for multy-region. If you press Up (or Down) button you can get into macrovision menu from here. Again, using Left or Right buttons switch between 3000 (Off) and 3001 (On) values. DVD-player keeps these new settings even after powering Off.
Coby DVD-223	Method 1: "Power up your player and turn on your TV Press the OPEN/CLOSE button on your remote control once Key in 3, 3, 0, 8, 8, 0 immediately: "R0" will now appear briefly on the TV screen in the bottom left hand corner. The DVE612(N) is slightly more informative, advising you that "REGION NO: 0" on the TV screen. Press the OPEN/CLOSE button on your remote control once Power down your player - this retains the all-region setting forever! RCE discs appear to playback without any problem. It is also possible to render single-region playback on the player by changing the number at the end of the sequence:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

le.g.

for just Region 1 playback the sequence is 3, 3, 0, 8, 8, 1 ("R1" appears on the screen)

for just Region 2 playback, the sequence is 3, 3, 0, 8, 8, 2 ("R2" appears on the screen)

and so on. Note that you need to run the entire sequence (i.e. including the power on/off and open/close routine) each time you want to change the region"

Method 2:

Power up your player and turn on your TV

Press the OPEN/CLOSE button on your remote control once, then CLOSE the tray with the same button.

Key in 3, 3, 0, 8, 8, 0

When you key each number you will see a "_" character appear in the upper left portion of the screen.

Press the OPEN/CLOSE button on your remote control once more and the CLOSE the tray with the same button.

Power down your player. When you power it up again it will be set to multi-region, in other words it will automatically play DVDs from all Regions without you having to do anything else!

Method 3:

- 1. Turn DVD player ON
- 2. Ensure the lid of the player is CLOSED and EMPTY
- 3. Press the numbers 5, 7, 8, 9 using the remote control supplied with the player (after you enter those numbers, the digit "9" stays on the upper left side of the screen to indicate that your dvd player is now region-free)

Your DVD player should now be region-free

Coby DVD-224

Method 1:

POWER-ON OPEN

PRESS 33088 plus region you want

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Ex: For region 5 PRESS 330885 Ex: For region 3 PRESS 330883 Than: OPEN/CLOSE POWER-OFF Important Observation: You won't see anything in the display during these steps. Put CD and check if it's ok, or try again. Method 2: with no disk in the player press: Setup, Vol+, Vol-, Vol+, Volin the right upper corner a current region code would appear. You could switch between 1,2,3,4,5,6 or 255 using Right and Left buttons. I believe, 255 is for multy-region Coby DVD-227 Method 1: Insert your DVD other then Region 1 Power ON Press SETUP Vol (+), Vol (-), Vol (+), Vol (-) When you do this you will see a "1" pop up on the top right corner of your screen, press the UP or DOWN keys on your remote (blue keys), This will change from any number 1-6. Next Press the LEFT or RIGHT arrows (blue keys), ONLY one time, you will see 3001, press the Arrow key DOWN and and change it to 3000. Press Setup and your DVD should Play! If my memory serves me correctly this should work without any problems, if the directions in the arrows don't work, then i may be backwards Method 2: Setup, VOL + VOL -, VOL + VOL -, the number 255 came up as well, SET YOUR DVD TO THIS #!!!!! THIS WILL LET YOU GET REGION FREE!, NEVER HAVE TO SET THE REGION. I put in our Region 2 DVD with that same setting and it played! Coby DVD-404 1. Press SETUP to get to the DVD Setup menu. 2. Press these numbers: 2,1,8,8. A new box which says VERSION should appear.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

3. Highlight VERSION and press the ENTER/PLAY button on your remote.

4. Use your RIGHT ARROW KEY on the remote to highlight the region number. Use the UP and DOWN ARROW KEYS to select which region you want. The numbers 1 through 6 represent

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	regions 1 to 6, while the number 0 represents REGION FREE. If you want it to be region free, take the number all the way down to 0 by using the DOWN ARROW KEY on the remote. 5. Once you have selected your region, press the LEFT ARROW KEY to de-highlight the region number. Press the DOWN ARROW KEY to highlight EXIT. 6. Press ENTER/PLAY to exit back to the main Setup menu. 7. Turn your player off. When you turn it back on, it will be region-free. The player MUST BE TURNED OFF in order for the changes to take effect. This region-free hack is for players with DVD software version M-XQ-M.
Coby DVD-505	1.open the tray- press set up 2.press the Vol + key 3.press the Vol - key 4.press the Vol - key 5.press the Vol - key ver 255 = region free ver 1= region 1 ver 2= region 2 press left and right to change
Coby DVD-507	Method 1:
	Press "Setup" and them Vol(+) Vol(-) Vol(+) Vol(-). On the up-left should display "Ver 255". That's it. If you see "version 1" instead, just use the arrows to change it to 255. I think then you can push the enter key and it takes effect.
	Method 2:
	Turn DVD Player on Press Setup on remote Press 2,1,8,8, a new box appear, go to version press region specific 1-6 or 0 for multizone. Turn off Turn on Enjoy
Coby DVD-508	for multi region press set up on remote press 2188 on remote go into version change region setting to zero

Method 2:

- 1. Power on
- 2. Open tray
- 3. On remote press 2812, region menu will appear
- 4. Use "enter" button on remote to choose region number or choose "9" for all regions.
- 5. Close Tray

Method 3:

Open Tray

Press Set up on remote

Enter 8,8,8,8 on remote

Press Next on remote

VERSION appears on menu

Select VERSION

Change region number / 0 for multizone

Press SET UP to exit

Off and On the player

Method 4:

I have a Coby -615 with Karaoke to change region code:

Power On

Open Tray, Press 2812, in upper left corner 3 dashes ---

will appear as you press the numbers, upon hitting the last number Region Menu overlay will appear.

Use ENTER button to choose number, I think "9" is for all regions.

Close tray, shut off machine.

The Numbers "8888" are the unlock code for changing the rating value, PG,R,and so on in the Rating section of the SETUP MENU.

Coby DVD-626

Method 1:

- 1. Turn the DVD Player ON
- 2. Open DVD Tray
- 3. Press the SET UP button using the remote supplied with the player.
- 4. Press 9, 8, 7, 0
- 5. Turn the DVD Player OFF

Method 2:

A new menu will be appear in the screen. Change with the remote control the Region Code.

3. Press quickly MENU 19

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Cyberhome CH-DVD 1. Power on.

320

- 2. DVD Tray must be empty if there's nothing in it, skip step 3 & 4.
- 3. Eject disc.
- 4. Close tray.
- 5. If tray is closed, and no disc is in, hit:
- Menu
- 1
- 9
- Enter
- 6. On this NEW model, you will NOT see a menu. You will just see a number. Use the up and down arrows to change the number from 1 to 0.
- 7. Hit Enter.

Cyberhome CH-DVD Method 1:

400

Press 'open': DVD tray will open

Press 'set up' on remote control: 'Main Page' menu will appear

Press 1,3,6,9 on remote control. Nothing new will happen yet

Press Left arrow 3 times: Nothing new will happen yet

Press Right arrow key once: A new option of 'Version' will appear on the menu

Use the remote to move down to the 'Version' section, and press 'enter' A new section 'Region Code' will appear, with a number '2' next to it

Use the Right arrow key to move on to the number 2.

Use the up and down arrow key to select the region you require.

The number '2' will change to your new region choice. (eg '0' for all regions)

Press the left arrow key to move back on to the 'Region code' section.

Press the down arrow key to 'Main Page' and press 'enter'

You will arrive back at the 'Main page' section

Select 'Exit set up'

Your new region will be set.

Method 2:

My CH-400 recently died on me and Cyberhome were very kind to replace it free of charge because it was still under warranty. However the new player has a different user interface on the setup menu.

Changing the region is now similar but with less button pushes.

- 1) As before open the tray, and enter the set-up menu on the player.
- 2) Go across to the general setup menu.
- 3) There you will see an option called version.
- 4) go to that option and highlight the version number.
- 5) now press, 1, 3, 6, 9.

This is what worked on mine and I just got it from HSN today.

Hack details:

Power up, no disk in.

Press MENU (status reads invalid key icon)

Press 1 (status reads invalid key icon)

Press 9 Menu is displayed.

Scroll down to Region ALL

Press ENTER

Press EJECT to clear the special menu

Or Press Menu again

CyberHome CH-DVR 1600

Method 1:

-Switch player ON with no disc in the tray. Close tray and press MENU, 1, and 9 on the remote control. A menu should appear with the Region Option. Highlight the Region entry and press ENTER on the remote. Type in the Region you want. (Put 0 for code free) Press ENTER again to confirm choice. Press OPEN/CLOSE TRAY button and put in movie.

Method 2:

To change setting from region 2 to the region of your choice:

- 1. Power on the player
- 2. With the remote control press set up.
- 3. With the remote control press the following sequence of numbers: 1, 6, 9, 5, 1, 8.
- 4. A hidden menu will appear.
- 5. Choose your required region from 0-9
- 6. Region 0 sets the player to multiregional.
- 7. Exit the menu and power off and then power on. The player will now be set to the region of your choice.

Method 3:

If the above hack does not work then please use the one below. It is dependant on whatever version of the Firmware is on the player. The latest version will work with the following:

- 1. Press Setup
- 2. Press Rec
- 3. Press ---
- 4 Press Rec
- 5. Select the region code with the number keys or the navigation keys. 0 for Multiregion.
- 6. Press Setup to return from the setup menu

For the 1600ME (UK)

press " setup " then " stop " then "[(next) "

Method 2:

- 1.- Turn On
- 2.- Press Open
- 3.- Press Setup, with remote, don't close the dvd plate in the hole process.
- 4.- Press Play on the remote.
- 5.-Choose TV Type in the menu with remote.
- 6.- Press Stop in the player (No remote)
- 7.- Press || (Next) in the player
- 9.- Region ID Menu Shows
- 10.- Select the region (with remote) or Bypass
- 11.- When in region desired press Play
- 12.- Press Seup with remote

Method 3:

to change the region of the dvd6000d is alot easier than you think.....just put a region 1, 2, 3, or 4 and so on into the player when it comes up with "wrong region" just push the "title PBC" button on the remote and away you go!!...the disk will play. works for me on my dvg6000d!

Daewoo DVG-8300SE

Method 1:

Open the CD tray

Push on the remote control 13794 and the region code number

For example 137941 for Zone 1

Close the CD tray and Enjoy

Method 2:

Turn on Open the tray press "13790"

Method 3:

Open the CD tray

Push on the remote control 1379 (on left side of the screen apears 4X)

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

- 4. The word Version will appear on the onscreen display
- 5. Select the new Version option from the menu
- 6. Change the region to 1 for region 1, 2 for region 2, and so on, or 0 for multi-region playback

Denon ADV-700

Here is a hack I found on the net. It works perfectly but you have to write a file on a CR-R. I can send you the file by email: mgibeault@post.com

ADV-700 SYSTEM, Updating Procedure of the DVD Software:

1) The updating procedure of the System (ESS Memory of the DVD).

Turn the Power Switch ON.

Press OPEN/CLOSE Button to open the Tray. Then, put the CD-R/CD-RW Disc for updating on the Tray and play it.

The FL Display shows "Start P. Load", and the writing operation is automatically carried out successively. The display shows SYS.VER.0000 (DVD ESS MEMORY) and the Tray opens.

Take the CD-R/CD-RW Disc out from the Tray.

After opening the Tray, set the unit to STANDBY mode, and press OPEN/CLOSE Button to close the Tray. Then, disconnect the AC Power Cord from the AC outlet.

- Note: Please do not turn the Power off until the writing operation completes.
- 2) Confirmation procedure of the Version of each software.

While holding STATUS and OPEN/CLOSE Buttons down together, connect the AC cord to the AC outlet.

The Power indicator turns into Red and the unit enters at Standby mode. Turn the Power switch on so that the Red LED indication changes into Orange.

Press STATUS Button. The FL Display shows:

- The Version of the System Microprocessor.
- The Version of the DRIVE Microprocessor of the DVD Mechanism.
- The Version of the VIDEO DRIVE Microprocessor.
- Region Code.(region: 1,2,3)

After confirming the versions, disconnect the AC cord from the AC outlet. The indications appear according to the above sequence. Therefore, please refer to the above.

- 3) Initializing procedure of the SYSTEM and DVD (Initialization)
- a) To initialize the System and DVD at the same time.

Disconnect the AC Cord from the AC outlet. While holding the PLAY and STOP Buttons down together, connect the AC Cord to the AC outlet.

When the Button is pressed continuously, the FL Display flashes totally.

When the Button is released, the FL Display indicates "INITIALIZE".

	b) To initialize the DVD only: After the Power is turned on, press SKIP REV Button for longer than three seconds. "INITIALIZE" appears and the initialization completes.
Denon DHT-500SD	Download the firmware and checksum. Ensure you have an uncorrupted version of the file by making a checksum of the firmware and comparing against mine. Advanced CheckSum Verifier is a good program to do this.
	Then burn the firmware file to disk with a dummy file called AADUMMY.XXX. This can be any file of roughly 40MB or more, just renamed. This allows the player to read the disk properly. Make sure you tick Verify Contents of Disc or similar in Nero to check it burnt without errors. Then power on the Denon and insert the disk. Should display a progress bar on the TV, then after a while a 'Done' message. It will automatically eject the disk. Remove it and press the power button to switch off the player. The player should now be multi-region.
Denon DN-V300	1. Turn the unit on.
Denon Biv V300	2. Press the "OPEN/CLOSE" button and open the tray.
	(Keep the tray open during the setting.)
	3. Press "CLEAR" "1" "4" "7" "0" "CLEAR" - "TEST MODE"
	will appear on the display.
	4. Press the "up" cursor key and "00 XX" (XX=this will be a
	numerical value) will appear on the display. The first
	two digits are incremented by one, every time you
	press "up"
	5. Press the "up" cursor key until you see 12 XX (default
	is 24) on the display. Press "2" 3" on the remote then
	the "ENTER" button
	6. Press the "up" cursor key again and you will see 13 XX
	(default is 23). If it does not say "23",
	Press "2" "3" on the remote and then the "ENTER"
	button 14 YYY
	7. Press the "up" cursor key again and you will see 14 XX
	default is 01). Press "0" "0" on the remote and
	then the "ENTER" button.
	8. Press "RETURN" 9. Press "CLEAR" twice
	10. Press "RETURN" (END should appear on the display)
	11. Press the "OPEN/CLOSE" button to close the
	11.11035 the OI LIVELOOD button to close the
Denon DVD-1710	1) Make sure DVD player is turned on
	2) Eject the Cd tray using the remote
	3) Press "5"
	4) Press "7"
	<i>)</i>

	5) Press "9" 6) Press "2" 7) Now you can select the region you want (1,2,3 etc) Press "0" to make it multi regional 8) Close the tray
Denon DVD-1910	Read instructions included in the .zip-file!!! You upgrade your Denon DVD 1910 player at your own risk.
	When that is said, the file has been tested at two players, and have yet to discver any errors. Zone 1 and 2 DVD's plays great.
	Here's a link to the file: http://www.geocities.com/denon_1910/download.html
Denon DVD-2800	http://www.geocities.com/mr_merrick/
Denon DVD-3000	Open the tray and push "setup" on your remote. Go to option 1 in the menu (Disc Language) then push enter. Then go to option 1 in the following menu and then press enter again. You saw that there is a code of four digits. For region 1 it is 0101 and for region 2 the code is 0102. So when you want to swap the region you enter the code for the region you want to watch. Then go back to main menu and insert disc, note that the tray is still open. Now do not close the tray by using the eject button but simply press the power button on the player or the remote. Now the tray will close automaticly and the player will be shut down. Now you will have to wait for 15 seconds and then put the player back on. Now the region is change and you can watch your selected region. Note that your player does NOT need any hardware modification or software upgrade to do this.
Denver DRS-1700	1. Change to DVD-mode and open Lid 2. Press 0000 3. Change Region (9 = Region Free) Press Open/Close to save
Denver DVD-122	 Open the player's tray. Enter 3308 on the remote control (you should see XXXX on the top left of the screen. Enter the region code as following (you should see the region number instead of XXXX): 1 for U.S. and Canada 2 for Europe, Japan, the Middle East, Egypt, South Africa, and Greenland 3 for Taiwan, Korea, the Philippines, Indonesia, and Hong Kong 4 for Australia, New Zealand, Pacific Islands, Mexico, South America, Central America, and the Caribbean

Method 2:

If your DiViDo is bought before the 1st of november 2000 you can do the following:

- 1. Connect the DiViDo with your TV and choose the right channel on your TV.
- 2. Activate the DiViDo without placing a DVD in it.
- 3. Place the batteries in the RC and push 'SET-UP' once.
- 4. After that you push 'TITLE' once.
- 5. After that you push 'STEP' once.
- 6. After that you push 'NEXT' once.
- 7. Now you've activated a hidden menu of the player and it is possible to change different settings like the region!
- 8. Now it's possible to play DVD's from every region! Have fun!

If your DiViDo is bought after the 1st of november 2000 you can do the following:

- 1. Connect the DiViDo with your TV and choose the right channel on your TV.
- 2. Activate the DiViDo.
- 3. Place the batteries in the RC and push 'OPEN' once.
- 4. After that you push 'SETUP' once.
- 5. After that you push: 9 4 0 1 0 (like this: 94010)
- 6. After that you push 'STEP'once.
- 7. After that you push 'SHUFFLE' once.
- 8. And last but not least you push 'NEXT'
- 9. Now, if you deactivate and activate your DiViDo it will be free of regions, so you can watch all DVD-movies!

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

If you only want to set 1 particular region, for example region 1, you'll have to do the same programming sequence, but instead of the 9 in step 5 you'll place 1 (for region $2 \Longrightarrow 2$, etc.) You can check which region-code is set in your DiViDo at the moment. Take your RC and push: 'OPEN' 'SETUP 'SHUFFLE' 'STEP' 'NEXT' . Now you've got a hidden menu and at the bottom you can see at 'DEBUG' the region that has been set. Regionfree is '9' Method 3: 1) turn on player 2) press: open, setup, 9,4,0,1,0, step, shuffle, next 3) turn off and on (i cant remember if i turnd off and on?) so first skip this, but go out of the setup !!!!! 4) press: setup, step, shuffle, next (secret menu) 5) go to 'DEBUG' and select the region u selected before (i used 9, so select 9 and press 'sel' to set 6) turn off and on, and it should be fixed now, check it by going into the secret menu again! p.s. after step 5, i did step 2, but i dont think u need to do it!! Method 4: After updating you firmware to 2.36 and is turned back to the default setting the code has changed... With Scan Firmware v2.36 it is now: open, setup, 9,2,0,1,0, step, shuffle, next DK Digital DVD-270 open 1369 + code (1usa 2 EU etc...) play (not close) DK Digital DVD-311 open 1369 and the code you need close DK Digital DVD-339 press OPEN press CLEAR key in 1, followed by 3, then 6, then 9, and finally 0 press the STANDBY button (the disc tray will shut and the player will switch off) press the STANDBY button (the player wakes up again)

Determine your tv decoder chipset (the GE-1101P has the BT865 chipset and the GE-1101PA has the CS4955 chipse). If you open up your DVD player it will be the small chip on the top left hand corner of the main board and will have a white box around it. If you have the BT865 chipset go here: http://www.nerd-out.com/darrenk/Shinco/GE1101Ppatch.htm If you have the CS4955 chipset go here: http://www.nerd-out.com/darrenk/Shinco/GE1101PApatch.htm GE Digital GE1101P **Firmware upgrade:** http://www.nerd-out.com/darrenk GE Digital GE1105P 1. Power on your player 2. Press and hold both the Play and Stop buttons on the player 3. After a short while you should be presented with a set of language options. Release the Play and Stop buttons on the player 4. You will now need to select a language option between 1 and 6. (Note: If you bought this DVD player in the USA, it will most likely have only three language options.) To convert this player to Multi-Region playback 1. Press the Repeat button on your remote control 2. Using your remote control, enter the code below. (Note that you must know what Region your player is currently set to in order to know which code is appropriate) for Region 1 use 2, 9, 3, 3 and 4 (USA and Canada) for Region 2 use 3, 8, 7, 6 and 7 (UK, most of Western Europe, Israel, Japan and South Africa) for Region 3 use 5, 6, 7, 3 and 2 (Russia, most of Africa and central Asia) for Region 4 use 7, 6, 8, 8 and 4 (Mexico, Australia, New Zealand, central & South America) for Region 5 use 5, 3, 8, 1 and 4 (Southeast Asia) for Region 6 use 2, 4, 4, 6 and 2 (China) 3. A code should be displayed on the screen indicating the current Region setting of your unit. 4. Press the 9 button on your remote control for Region free, or 1 for Region 1, 2 for Region 2 and 5. Press the Open button on your player 6. Press the Pause button on your remote control If the player sticks on FBI Warning screens

Genica GN-800 Kalua	Method 1: 1. Eject the tray 2. Key in on the Remote Control 2180 3. Enter the Region code 1-6, or enter 9 to enable All Regions (Region Free). Method 2: 1. Eject the tray 2. Using the Remote Control key in the following sequence: ZOOM, A-B RPT, Up Arrow, Left Arrow, Down Arrow, Right Arrow 3. The words "REGION FREE" should flash briefly on the screen to confirm that the unit is now Region Free. *Note: All mods are preformed using the buttons on the remote control.
Goldstar GBV441	Step 1 Download the file lg5000.zip by clicking on the link: http://www.area450.co.uk/images/LG5000.zip
	Step 2

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Unzip the file lg5000.zip. It will create a directory folder called RMTM0000. Step 3 You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder). Step 4 You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc. Step 5 I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R Step 6 Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need! *** When burning the disc do not use DirectCD *** Step 7 Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. Power off and... it's done! Goodmans DVD Switch on the player and open the drawer, insert R1 disc, close drawer, while the player is loading the disc get your finger jabbing at the number 1 key on the remote. The disc starts playing but you 2100B then have an annoying "WRONG REGION" message in the top left hand corner of the screen, this you can get rid of by pressing the P/N button on your remote, you are left with a small white button type thing in the right hand corner but at least you can watch your region 1 DVDs Goodmans DVD 1. Open the drive tray 3500PK 2. Press the buttons 9, 8, 1 and 7 on your remote, one at a time and in order 3. You will now be in the hidden menu where you can change the region from 1 to 6 by pressing Enter on your remote control, or set it to 9 for multi-region 4. You can also disable Macrovision from this screen 5. If your TV does not support NTSC, you should change the output to PAL in the normal setup menu

	8.press setup on the handset to exit the setup menu.
GoVideo D2730	Make sure no disk in drive. Power up (or power cycle) with remote (no need to use front panel). Enter the following from the remote using number keys once it realizes there is no disk.
	SETR9 - region free
	or
	SETR where is the region you need, 1,2,4, whatever. Player respond "Setting region code to"
	Will accept disks straight away, no need to power cycle!
	(Does PAL->NTSC conversion as you'd expect these days)
GoVideo DV2140	Firstly you will need to download this zip file (5KB size)http://www.area450.co.uk/images/LG5000.zip
	Once downloaded, unzip the file and follow these instructions, supplied by Andy:
	Step 1
	Download the file lg5000.zip by clicking on the link above.
	, and the state of

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Step 2

You will need Winzip or Easyzip as the file you have downloaded is in a compressed state or 'Zipped up'. Open the file lg5000.zip then extract or uncompress the file kpjc19_1.dvd to you hard drive in say your 'Mydocuments' folder. (Here is the confusing bit) it will create a directory in your Mydocuments folder called RMTM0000, this you accept and go with the flow.

Step 3

You need a CD writer to burn or write (another familiar term is formatting the disc) a new disk which will copy the files you've just extracted or uncompressed ie RMTM0000.

Step 4

You need CD burning software like Easy CD Creator, Nero Burning Rom or CD Clone

Step 5

Buy that CD-R disc to burn to. Now I've read the text in the file about not using a 700mb capacity CD-R but mine worked. For information, I used a Memorex CD-R 700MB 24x from Staples (24x means the speed to which data can be transferred or read). This speed I think is the key to success not the capacity or size of the CDR.

Step 6

Using the CD burning software you need to create a Data CD not audio etc, and add the directory RMTM0000 from your Mydocuments Folder in Step 2. That's all you need! As the real file is automatically copied over as well. (If you've not used Nero or Easy before, there are instructions on the main Area 450 site relating to Sampo DVD players, but the same principles apply: check the second and third pages of the article here

http://www.area450.com/firmware/burnfirmware.htm).*** When burning the disc do not use DirectCD ***

Step 7

Switch on your player and TV and insert the newly burned disc. When prompted select 0 for multiregion and then ENTER, power off and you're ready to go!

GoVideo DV2150

To change the region on this player

- 1. Press the DVD button on your remote control to select the DVD functions on your player
- 2. Press the Eject button on your remote control to open the disc tray
- 3. Using your remote control, press the buttons 0, 5, 2 and 0, in order, one at a time

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	This is originally for an LG5000 player but works on other Zenith players as well - so on mine! It's so easy and works permanent :-)
	Method 2:
	Go to DVD mode. Press pause. Enter Pi until FF appears (314159) Enter region desired (0 for region-free). Press pause again.
	NOTES:
	Will not work while DVD is playing, while CD is playing, or while in ``dISK LOAD" mode. However, it will work while DVD or CD is stopped.
GoVideo GVP7811	Partially successful hack - hit "1" repeatedly during DVD loading to load non-region-1 DVDs - unfortunately after you do this the controls seem not to work so you can't navigate the menus. You can only actually watch movies that have no menu or start the movie on a timer after the menu loads. The menu does load, however.
GoVideo HT2015	Method 1:
	 power up, no cd in drive press "setup" go to "country code", using the up and down cursor keys. It displays "US" as country code. press the RIGHT cursor key. You are prompted to enter a 4-digit password. enter 0000 and press "enter" (center cursor button). Hooray, using the cursor keys, you can now change the two letter code at will. Use "enter" to save it.
	Problem: I have no clue what to enter to change the region to 02. I tried a number of European country abbreviations. to no avail.
	Method 2:
	Follow this hack for the DVD-5000 Series LG DVD Players: http://www.area450.co.uk/lg5083hack.htm
GoVideo R6740	1. Enter set-up screen by pressing setup on the Remote Control. 2. Move cursor to 'Exit' 3. Using remote control: key 2,9,6,0 4. On pop-up menu select 'Region Free'

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	button which puts it into standby mode, and then "power" again to bring it out of standby mode.
	With no disk in it, press "0" "0" "" for the region you want. and then "exit" and it will set it to this region.
Gradiente D-12	Turn your DVD on and make sure there's no disc inside. With the remote control press: 00 clear. and it's ready, it's region free. Or, if you prefer, press 00 and the region you want. For example: 001 (for region 1) 002 (for region 2).
Gradiente D-20/3	 Turn on your dvd player (be sure that are no midia inside the player). Type, in remote control, 314159. It will apear the region number that your player is currently set. Type the region qhich you config (i.g. if region 2, press 2 in remote control) or 0 to region free. Press enter buttom in remote control.
Gradiente D-200	With player turned on, no disk and tray closed. Press 0 0 Clear on the remote.
Gradiente D-201	1)Turn on the equipment without any disc; 2)In the screen that will appear (featuring the manufacturer logo), type the number 9735; 3) The menu to choose the region will appear. Choose 0 if you prefer; 4) Push "Play"; 5) Then push "Exit"
Gradiente D-21/3	Turn on the player and remove any disc On the remote control press: "31 41 59 XX" and "Enter" to confirm Where "XX" is the region you want to set up: 00 - Free region 01 - Region 1and so on The message "Region X" shows on screen.
Gradiente D-22	For codefree in this player you only need to push zero twice, then push the clear button. Maybe this works for the D-10 and D-12. Btw, it only works without any disk in the candy. You can also choose the region playing with the numeric pad in the remote control.

- 14. press "ok" on the remote to change the region.
- 15. use the down button [directly under the "ok" button on the remote] to scroll down the list.
- 16. select the word "none" to make your unit region free.
- 17. the warning you see is probably meant to do nothing more than frighten you, I don't think you can damage your player by altering this since it's only altering region codes which have nothing to do with anything vital to the unit. [no worse than changing ty channels really].
- 18. press "i" to end.

Grundig Xenaro GDP 1. hit "i" on the remote.

5120

- 2. choose "installation" (or menu item 5).
- 3. choose "extended settings" (or menu item 5).
- 4. choose "service menu" (or menu item 3).
- 5. choose "dealer service menu" (or menu item 2).
- 6. Enter access code "8500".
- 7. choose "system messages".
- 8. select "on" and hit "OK" on the remote.
- 9. return to the service menu (with "<" on the remote).
- 10. choose "system information".
- 11. enter "70307198" with the remote.
- 12. "system messages" will appear with a number or "none" next to it.
- 13. hit "OK" on the remote and select the region code for the player with the up and down keys ("none" for region code free).
- 14. hit "OK".
- 15. hit "i" to end.

6150

- Grundig Xenaro GDP 1. Get into the Service Menu. This is not intended for home users, only for service technicians. Therefore you're asked for an access code, it is 8500 for all Xenaro DVD Players.
 - 2. Activate "System Messages" using the Service Menu.
 - 3. Leave the Service Menu and get into the "System Information" Menu.
 - 4. When you see the System Infos, enter the following code on the remote control. Note that the player

will not print the code on the screen, you have to enter it blindly.

The code is: 70307192 (This is the one that differs from the 5100 model.)

- 5. A system message should appear. It will not appear if you got the code wrong or if you did not activate system messages in the service menu. Confirm the message with OK on your remote.
- 6. Now a window appears in which you can change your region code. Values 1 to 8 and "none" are possible. "none" will disable the internal check of region codes (i.e. makes the player CodeFree), but RCE titles might not work. This doesn't really matter, as you can change the code as often as you wish to match a specific disc.
- 7. If you want to, you can disable System Messages again using the Service Menu after you changed the code.

Grundig Xenaro GDP 6155	 Get into the Service Menu. This is not intended for home users, only for service technicians. Therefore you're asked for an access code, it is 8500 for all Xenaro DVD Players. Activate "System Messages" using the Service Menu. Leave the Service Menu and get into the "System Information" Menu. When you see the System Infos, enter the following code on the remote control. Note that the player will not print the code on the screen, you have to enter it blindly. The code is: 70307192 (This is the one that differs from the 5100 model.) A system message should appear. It will not appear if you got the code wrong or if you did not activate system messages in the service menu. Confirm the message with OK on your remote. Now a window appears in which you can change your region code. Values 1 to 8 and "none" are possible. "none" will disable the internal check of region codes (i.e. makes the player CodeFree), but RCE titles might not work. This doesn't really matter, as you can change the code as often as you wish to match a specific disc. If you want to, you can disable System Messages again using the Service Menu after you changed the code.
Grunkel DVG-20NT	Using the remote control, key in the following: Setup, Stop, Skip Backwards, Skip Forwards. You should then be able to change region and remove Macrovision.
Grunkel DVG-22NG	 Turn on your player Open the tray Press 8 4 2 1 on the remote control> "Region 2" appears on the TV screen Press SELECT until 9 for region free & macrovision
Grunkel DVG-32S	Press Setup press Volume + Press Volume - then press the right arrow until the screen on the player reads 255 press setup to exit and all done
GVG DV-910B	Load up the DVD player (no disc in!!!!!! very important!!!) then press setup to access the normal menu press STOP, PREVIOUS TRACK, NEXT TRACK
H & B DX-3255	- Power on the player - Press the "Setup" button - Go in the "preferences" menu - Enter the following code: 49540

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	- Select the desired region with the arrows (0 for region free)
H&B DRHD-120	With DVD Tray in open position / Any source other than TV selected / press 7, 7, 0 for region 0; 7, 7, 1 for region 1 etc.
H&B DRX-430	with no disc inside press 7, 7 and a number (1, 2,3) for a desired region code (0 for all regions) followed by power off.
H&B DX-3110	With No Dics in the Drawer: Press 7,7 then Play,
	Select 0 from the Menu for All Regions or Specific Region Code. Press Enter to Confirm
H&B DX-3220	Everything must be done with the remote control:
	- Power on the player - Press the "Setup" button - Go in the "preferences" menu - Enter the following code: 49540 - Select the desired zone with the arrows (0 for region free)
H&B DX-6526	I made 3 CDs from ISO-files (In your burn software choose "burn image", no multisession, close disc, disc-at-once.) - first I upgraded with real H&B firmware: H&B_DX-6526_FW2.6.8_PAL from www.hb-direct.com, just to make sure I could go back in case of something going wrong. Put the CD in, power off&on (=powercycle), the menu apears, I choose 'full update' and it works! But the next steps also work so you don't need this first step. - you need firmware version 2.7.x for the region hack to work. So upgrade with kiss firmware from http://www.gooddvdstuff.com/files/ I don't like the fun backgrounds you find there, so i used KiSS_DP-450_FW2.7.4_PAL.zip. Or use the more official http://www.kiss-technology.com/Use the iso like explained above. Next time you power on, you need to do the quick setup. I did that now, just to be sure. And I played a DVD I saw before for a second, because Kiss needs to lock a region before you can unlock it. - Next you need the hijacker hack. Just google for 'kiss hijacker rpc1' because http://hijacker.rpc1.org/kiss/ was down when I looked a minute ago. For this CD you don't need to powercycle. Just select update. Ready after a powercycle! - Now, as you know, region free doesn't mean it's all automatic. YOU choose the right region as often as needed: On the remote: eject(or open tray), clear, 2, 7, 6, enter And in this menu you can choose the region! You did it! And you feel GOOD! By the way, the firmware update also gave you DivX 3.11 and other improvements like FF/RW in DivX movies.

The hack performs all it promises (region selectable)
But it does unfortunately ALSO something else:
==> you will loose the ability to play MP3 <==

Hitachi DVP515

Method 1:

Press the Repeat button on your remote control

Using your remote control enter the code below, note that you must know what Region your player

is currently set to in order to know which code is appropriate

for Region 1 use 2, 9, 3, 3 and 4

for Region 2 use 3, 8, 7, 6 and 7

for Region 3 use 5, 6, 7, 3 and 2

for Region 4 use 7, 6, 8, 8 and 4

for Region 5 use 5, 3, 8, 1 and 4

for Region 6 use 2, 4, 4, 6 and 2

A code should be displayed on the screen indicating the current Region setting of your unit.

Press the 9 button on your remote control for Region free, or 1 for Region 1, 2 for Region 2 and so on

Method 2:

DV-P515e Always perform a Cold Start before applying the hack below

- 1. Power on your player
- 2. Press and hold both the Play and Stop buttons on the player
- 3. After a short while you should be presented with a set of language options. Release the Play and Stop buttons on the player
- 4. You will now need to select a language option between 1 and 6
- 5. Power off your player and then power it back on

Method 3:

- 1. Press the Menu button on your remote control
- 2. Press the Repeat button on your remote control
- 3. Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate

for Region 1 use 2, 9, 3, 3 and 4

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

Hyundai DVD-320A Method 1 (older model):

- 1. Press the Open/Close button on your remote control to open the disc tray (keep open)
- 2. Press the 3 button on your remote control
- 3. Press the 8 button on your remote control
- 4. Press the 0 button on your remote control
- 5. Press the 0 button on your remote control
- 6. Press the Menu button on your remote control
- 7. Using the arrow buttons on your remote control, change the region to 1 for region 1, 2 for region 2, and so on
- 8. Press the Enter button on your remote control
- 9. Press the Menu button on your remote control

Method 2 (For the new models):

- 1. Using your remote control, press the buttons 7 and 7, in order, one at a time
- 2. Press the Play button on your remote control
- 3. You should now be in a hidden menu
- 4. Using the Up and Down buttons on your remote control, highlight the Country Code option
- 5. Press the Enter button on your remote control
- 6. Using your remote control, press the 1 button for region 1, 2 for region 2, and so on, or 0 for multi-region playback
- 7. Press the Enter button on your remote control
- 8. Press the Play button on your remote control

Method 3:

Make sure no DVD is inserted

- 1. Press 7
- 2. Press 7
- 3. Press x (x = your required region)
- 4. Message returns with "Region x"

Example: 7,7,0 would return "Region Free"

Note that Region 0 mean Region Free

Hyundai DVD-360A **Method 1:**

- 1. Press the Open/Close button on your remote control to open the disc tray (keep open)
- 2. Press the 3 button on your remote control
- 3. Press the 8 button on your remote control
- 4. Press the 0 button on your remote control
- 5. Press the 0 button on your remote control

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	- Press [4] - Press [6] - Press [0] (Region Free)
iiSonic II2002	Press Open and press 2, 9, 6 and 0 Next menu choose: 0 for multi region code and choose macrovision off.
iiSonic II2316	during stop mode, press the "setup" button to acces the "preference setup" menu. here, you can choice any country region you need.
iLO DVDR04	Enter "Setup" menu on the screen. Scroll down and highlight "Exit". While "Exit" is highlighted enter 2,9,6, and 0 and press "Enter". A hidden menu pops up and you can select your region.
iLO DVDR05	Conversion to CyberHome 1600 with ability to burn both + and - media. This may only be possible with the ZU units and not the MU ones not sure anyways here it is Just a note on the Ilo DVDR05. I have one of these and it records tapes with macrovision just fine as long as you use the coax input on the recorder to recieve the signal. Also, this player is convertable to a CyberHome 1600 firmware with the ability to burn both + and - media. If you want to upgrade the firmware on the ilo you must get the matching firmware from cyberhome (zu or mu), install the loader without trouble, then change the text in the file 'UPGRADE.VER' on the system firmware (back end) to this or the ilo will not upgrade! below this linedon't include this text ZORAN CH1600.IMG 18.3 1632954941 above this linedon't include this text Also note, not sure if this is needed, but I think you have to name the modified 'back end' CD you create 'DVDR05_ZU' as the label (if you have a ZU MU if you have that). It's trial and error, just play around

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	with all this and you'll figure it out. All in all keep in mind this is a three step process 1: Create Front End CD with iso image from cyberhome and install 2: Create Back End CD with iso image from cyberhome and copy over files to modify from it 'UPGRADE.VER' remake CD with changed file and install 3: Install original Back End CD over the changed one and use the settings menu to load all system defaults all done. :)
	This works fine with the current version of cyberhome's firmware (70) NOT TESTED WITH ANY OTHER VERSION. However once you get this to stick, you can now with no trouble at all update the firmware as normal with cyberhome updates.
	Firmware is here BTW: http://www.cyberhome.com/downloads.asp?Product=1600
iLO DVDRHD04	Enter "Setup" menu on the screen. Scroll down and highlight "Exit". While "Exit" is highlighted enter 2,9,6, and 0 and press "Enter". A hidden menu pops up and you can select your region.
Initial DMA-710	Insert your non-region-1 disc into the player and close the tray, and begin pressing the "1" button on your control repeatedly until the "wrong region" message appears on the screen and the program begins. You can watch the disc, but you cannot ff/rew/pause. If pressing "1" brings you to a menu (which you will not be able to navigate), open the drawer, then close it again and try "2" (or "3" or so on until you hit paydirt). I have successfully played a region 2 and a region 4 disc on this unit using this method.
Initial DVD-2540	find D0006(24c02),to connect pin7 to pin1234(gnd) and region is free!
Initial DVD-5820	to play a region 2 disk, insert your region 2 disk, turn on the power and keep pressing button 1 on your remote control. The disk should now load up and be playing the movie. If it does not work turn off the power remove the power socket and then start again. The only drawback is that there are subtitles on the screen and you go straight to the movie and are not able to access the menu pages.
Initial DVD-9510	Place inside a DVD region 2. The message "Wrong Region" appears. Keep pressing a number of your choice on the remote control. Close the unit. Power it up ,but now press repeatedly number 3. Enjoy the movie!!!
Initial IDM-1210	step 1: turn on the power

	buttons until the display panel shows "FFO KCUF". Then insert the SCART-cable again. Voila. The DVD-player is regionfree and Macrovision Free 4ever. On the device itself, press and hold the STOP button for about five secs. The display will display INITIAL afterwards. If you still keep pressing the STOP button, the display will display WAIT Maybe at that point it is resetting something? I'm not sure since I do not have any DVD's from another region at this moment.
JVC TH-A35	Firmware Upgrade: File: http://leewest2000.tripod.com/JVC_TH-A35R.zip
	Instruction: WARNING: FAILURE TO FOLLOW THESE INSTRUCTIONS CORRECTLY WILL RESULT IN A DAMAGED AND UNUSABLE DVD PLAYER!!! WE ACCEPT NO RESPONSIBILTY FOR ANY DAMAGE CAUSED TO YOUR PLAYER BY USING THIS UPGRADE CD. 1) Switch on the player. 2) Open the disc tray 3) Place the disc in the tray and close it. 4) The player will now load the disc and the TV screen will say "Load from CD" 5) Using the remote control you must select YES then press ENTER. 6) The upgrade will now start to load, the display on the player will show "Reading". This part of the process should take around 1 minute. DO NOT TOUCH THE PLAYER AT THIS TIME NEVER UNPLUG THE PLAYER OR TOUCH ANY KEYS WHILST IT IS STILL SHOWING "Reading" 6) After around 1 minute the tray will automatically open and the TV screen will say "Restart Player". At this time it is safe to remove the disc and switch the player off using the remote control.
	7) The player will switch off leaving the tray still out, when you switch the player back on the tray will close and the process is complete. Your player is now multi-region.
JVC TH-A5	 Switch on your machine, let it finish it's set up as normal. Hold down the stop button on the unit-not on your remote, until the word INITAL appears on your display. Insert your region 1 disk into your machine and enjoy The machine will reset itself back too region 2 when you switch it off. So follow this simple step each time
JVC TH-A5R	 Switch on the player with no disc in the tray. Press & hold STOP button on the player until 'INITIAL' is displayed on LCD. Release STOP button. Then press and hold VOLUME- key until volume reaches minimum. Then press and hold VOLUME+ button until volume returns to the same level original level.

	4. The player should NOT have switched off during this procedure.5. Press OPEN/CLOSE button and enter your disc.6. Close the tray and the disc should play automatically.	
	This definitely works for Region 1 DVDs on a Region 2 Player (I Havent got any other region discs to try)	
	This hack needs to be done each time after the player has been powered off.	
JVC XV-511BK	Open top of dvd player right hand front of player as you are looking at it, look for b532 snip wire replace top cover of dvd player. Plug system back into mains it will ask for pw enter 5963 with remote control, Unplug dvd player at the mains then plug back in you now have region free . If you have system with serial number from 134xxxx to 144xxxx if you switch dvd player of by stand by switch it will then return to region 2 so you will need to unplug then plug back in to get region free again	
JVC XV-515	ALL YOU DO IS LOCATE WIRE JUMPER B532 ON THE PRINTED CIRCUIT BOARD NEARBY THE FRONT PANEL,IT CAN BE FOUND JUST UNDERNEATH THE CONNECTOR LINKING THIS BOARD WITH THE ONE ABOVE. 1. CUT THE JUMPER 2. TURN ON THE POWER 3.PW (PASSWORD) WILL BE DISPLAYED 4.ENTER THE CODE 5963 WITH THE REMOTE PW OK WILL BE DISPLAYED THEN SWITCH THE SET OFF AND ON. THIS WILL MAKE IT MULTIREGION BUT EVERYTIME YOU WANT TO WATCH A MULTIREGION DISC YOU WILL HAVE TO INSERT THE DISC THEN UNPLUG THE MACHINE FOR A FEW SECONDS THEN JUST PRESS PLAY DO NOT PRESS THE ON BUTTON !!!!!!! AS THIS WILL MAKE IT REGION 2 AGAIN	
JVC XV-D2000	1. Press Power to turn machine off 2. Wait 5 seconds 3. Press and hold DVD Menu and On Screen on the machine together, and then press Power on the machine to switch it back on 4. Let go of the DVD Menu and On Screen buttons 5. Press Standby on the machine, the display should now show either "TEST 2", "TEST4", or	

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	,
	"TEST 6" depending on the machines existing
	region setting
	6. Press DVD Menu on the machine twice in a row,
	and the display should now show "000 5858"
	7. Press the Up and Down cursor buttons, and
	change the first three digits to "02E"
	8. Press the Right and Left cursor buttons, and
	change the last four digits to "0000" for Region
	Free, "0101" for Region 1, "0202" for Region 2,
	"0404" for Region 4, "0808" for Region 8, and
	finally "2020" for Region 20 ***See Note at bottom.
	9. If you are having problems with Region 4 disks
	change the above setting to "0458" and make sure
	PAL or NTSC is correctly set on your machine
	10. Press Enter to confirm the Region change
	11. Press Standby on the machine to turn it off
	12. Wait 5 seconds
	13. Press Standby on the machine to turn it on
	*** Instruction 8 has an option for Region 8, this
	Region is a special reserved Region for Special
	international venues (airplanes, cruise ships, etc.)
	. Region 20 is unknown. Do Not use it!
	The region hack given earlier does work, however, there is a modification you must do for North
	American editions of this player. The problem is that the NA (and possibly Japanese) versions of the JVC XVD2000 do not have a full power off button. It only has a standby power button (so
	some of the machine lights stay on).
	So, in order to make the region hack work, you have to UNPLUG the machine for every step that
	requires you to power off. ie, Actually physically unplug the machine from the wall then plug it
	back in. This has the same effect as pressing a true power on/off button.
JVC XV-E112	For removing region code from this, and many other jvc dvds, you need special jigg and software
	to upgrade firmware. there is no key combinations or anything with the remote control.
JVC XV-FA900BK	1.Power off
	2.Press both "skip" button (<<>>) and press standby on the player, the machine will show
	"Region -", after 2 seconds, it will show "Region 1".
JVC XV-M512SL	Method 1:
	<u> </u>

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

4" or "TEST 6" depending on the player region

- 6. Press the DVD Menu button on your player twice in a row, the display should now show "000 5858"
- 7. By pressing the Up and Down cursors buttons, change the first three digits until they read "02E"
- 8. By pressing the Right and Left cursors buttons, change the last four digits until they read "0000" for Region Free, "0101" for Region 1, "0202" for Region 2, "0404" for Region 4, "0808" for Region 8, and finally "2020" for Region 20.
- 9. If you experience difficulties with Region 4 discs, change the above setting to "0458" and make sure that PAL or NTSC is correctly set on your player
- 10. Press the Enter button on your player to confirm the region change
- 11. Press the Standby button on the player to turn it off
- 12. Wait 5 seconds
- 13. Press the Standby button on the player to turn it on

JVC XV-S300BK

Method 1:

Make sure there is no disc in the player

Unplug dvd player

Plug system back in while holding the "Open/Close" and the "play" buttons (ON THE PLAYER, NOT the remote)

The word "Test" should come up on the player Display

Press "9" on the remote until the display on the player says "00A0 0000"

Press "Standby/on" (remote or player)

Wait 15 seconds

Turn player back on

YOUR PLAYER IS NOW REGION FREE!!!!!

(This Hack also works for the 302 *Silver* version)

Method 2:

1)TAKE OUT ANY DISC YOU HAVE (unless you want it scratched)

2)unplug Player

3)re-plug while holding the open/close AND play buttons(on the player itself)

4) press the forward skip button (on the player)

	Wait 15 seconds
	Turn player back on
	YOUR PLAYER IS NOW REGION FREE!!!!!
JVC XV-S60BK	Unplug the unit from the wall and leave it for a minute. Plug it back in and push the power button. Take the remote control in one hand and put a cd or dvd case on top of the buttons. Make sure you cover all the buttons except for the power and the open/close button. Press down and hold the case against all the buttons at the same time for a few minutes. I repeated the steps 4 times, however it may not have been necessary and now it works. JVC XV-S60 is region free.
jWIN JD-VD100	With the machine on and no disk loaded, press Setup on the remote. When the Setup menu appears, press Skip -, Skip +, Skip -, Skip +, Skip
	It will then indicate the version (region) setting in the upper right-hand corner. Use the left and right arrow buttons on the remote to select the region you want. selecting VER 255 will set the player to be code free.
	Press Return on the remote once you have made the selection.
	No need to turn the machine off and on again.
jWIN JD-VD120	1- Press Setup Button 2- Press 1,3,6,9 3- Region Code display should appear (For Example: Region Code 1) 4- Use Up & Down key from remote control to change the Region (If the Region Code is 1, then press Down Key you will see Region Code 0) 5. Press Enter from remote control to accept the change
jWIN JD-VD130	1) Open tray 2) Press the "PROG" button 3) Press the "ENTER" button 3 times 4) An indicator of the zone will be whown 5) With the UP/DOWN arrow keys set the region to 0 (for multiregion)

	Save with "play" end with "Setup"
Kennex DVD22K5	1) turn on DVD 2) press the "setup"button on the remote 3) press 1 3 6 9 with the remot 4) press the LEFT button ? 3 TIMES 5) press the RIGHT button ? 1 TIME This is the SETUP MENU. Navigate down to "VERSION" and press "OK" on the remote!!
	Now you can make any change you want by using the RIGHT arrow? and the arrow UP and "OK"
Kenwood DDX7015	1, put disc into player 2, shut down player with src button 3, reboot player using src button and hold in play/pause button untill disc plays unregioned disc
Kenwood DV-2070	"Turn on DVD-Player without disc. Hold Play button in on DVD-Player for +-10 seconds. Power off. Power On. Player now supports multi-zone." Everything works fine on the DVD all functions.
Kenwood DV-605	 Power on the DVD player. Open and place the DVD in the tray. Wait for the player to display 'DISC ERROR'. Your screen may also tell you that you have tried to play a disc that can not play on this player. Ignore this. Now simply press number 1 on your remote, and viola! You can now sit back and enjoy your other region DVD's. You can now navigate the DVD as usual. The number 1 is for chapter ONE. I tried pressing other chapter numbers but only ONE works. Once the movie starts, you can access the DVD menu to change audio, subtitles, etc.
Kenwood DVF-3050	Turn on DVD-Player without disc. Hold Play button in on DVD-Player for +-10 seconds. Power off. Power On.

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Player now supports multi-zone.
	1.Put in a disc with a region different from what your player supports.
	2. When the region violation screen appears the display on the unit itself will show "Disc Error"
	3. Press stop on the remote control until the display on the unit changes to "DI"
	4.now you can choose any chapter by pressing a two digit number(e.g. 01 for the beginning of the movie) followed by play on the remote or you press "00" followed by the menu button on the remote to get to the menu of the disc.
	5enjoy region 1 encoded dvds(I only tested it on reg 1 discs so I don't know if it works on other regions)
Kenwood DVF-3530	Method 1:
	Turn the player on, remove the disc, and close the tray. 1. Select the "setup" menu by pressing the Menu button 2. Select "Audio" by pressing >. 3. Select "Other" using the arrows an press "Enter". 4. Select "7070" (Region Auto) using the number buttons. (7071 = Region 1) 5. Press enter to save the new region. 6. Turn off the DVD player 7. Wait for a few seconds and turn the player on. Note: Some DVD-discs can not be played in auto. If this not works, you have to modify your DVD-player whit a new tool-kit. Method 2: Remarks: (*) -Arrows Buttons up
	(**) -Arrows Buttons right > The only way for me to watch region 1 dvd's in Kenwood DVF-3530 is: When the region violation screen appears, Press the P.mode button. The "Program Edit" menu will appear. The title should show [1]= the all movie usually. ([2],[3],[4]are used for other features.) if not use the remote numbers buttons or arrows).

No sele mo mo	ove to Chapters, ow add manually the chapters by repeating the sequence: lect Chapter[1], ove to Add, press Enter,
mo mo	ove to Add, press Enter,
	ove back to Chapter, select [2], ove to Add, press Enterand so on, I the last Chapter.
if it	ote that it is restricted to only 32 Chapters. it's not inuff you will have to dellete them all er watching them, and add the Chapters You have not seen.
The	en move to PLAY press enter and enjoy the movie.
	ote that by watching the movie that way you wont be abble to see the subtitles or use any of the ual Menu features
pre swi	ritch on the dvd player and open tray. ess and hold the play and stop button for 10 seconds ritch off and reboot by pressing and holding the play button. en tray and place in your disc.
you	ur dvd player will now be multi region.
abo say unt	efore loading a disc, press and hold the play button on the unit itself (NOT remote control) for out five seconds. The display panel will then show what region you are (e.g. in Australia it will y Oceania). By using the remote up and down keys, you can then scroll through the regions til you find the region you require. Select it by hitting the enter button. The display will then y "Initial OK!". You are ready to put a disc in.
	ote: You will have to perform this function every time you play a disc from a different region to st last played.
It's	works also with the remote control and also with a disc inside! s good practise to power-down/power-up after the "hacking" sometimes it's really necessary in der to work.
The	e the hack for the DVF-5010; it is the same. le only difference is on my machine I can hold the 'play' tton on the remote or the player to apply the hack.
Kenwood DVF- 1. I	Power on the DVD player.

	the main setup menu appears press 1-6-7 on the remote. You will be able to choose between regions 1-6. press "mute" button for all regions region-free. i tried on my koss-C220 it worked. but i did not checked with different region DVD's
Koss C928	1. Ensure there is no disc in the player's tray. 2. Using the remote control, key in the following: Menu, 1, 6, 7, followed by the region number required, or use Mute for region free.
Koss DVP2161	http://groups.yahoo.com/group/koss216/files/
	I just want to share my experience.
	I tested it on 2 players. Works great. I was able to play region 1,2 and All after hack.
	I just wanted to let everyone know that the above hacks work. You can go to the yahoo groups, download the program, and do your upgrading with no problems. Trust me, I am a total newbie, and only recently found out that DVDs are hackable. It is very easy.
	Also, since most people have EZ CD Creator, which comes with their new computers, this website really helped me out:
	http://www.area450.com/firmware/burnfirmware2.htm#Easy%20CD%20Creator
	Even though when you download the file from the yahoo group, the readme file specifically says "DO NOT use UDF packet writing type software such as direct cd to author the Disk." I didn't follow their advice (since I didn't really know any better, and followed the instructions on the area450 website (link above), and came out with fantastic results.
	***Also, although there may be some confusion, I know I was a bit worried about the idea that the Koss player I had was not specifically the one listed in this forum, I found out by reading the yahoo group that this hack works on the DVP-2161, DVP-2162, DVP-2163, and DVP-2164.
	The only differences between the numbers are the colors offered and the inclusion or lack thereof of those flower decoration.
	I just wanted to let everyone know not to be afraid, and it does work. And even if you are still afraid, the yahoo group above gives you the download of the original software that came with your Koss player - so even if you screw up, you can always put it back to the original settings.
Koss KD210	With tray open press "menu" on the remote, and after the main setup menu appears press 1-6-7 on the remote. You will be able to choose between regions 1-6. "0" is said to leave the machine

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc. Step 5 I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R. Step 6 Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need! *** When burning the disc do not use DirectCD *** Step 7 Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. Power off and... it's done! LG 5083 Method 1: 1. Wait until the message "no disc" or "region coding error" appears before you proceed to step 2. You only have a second or two to enter the code below. 2. Press PAUSE, ENTER, 3, 1, 4, 1, 5, 9 on the remote control. 3. Press 0 for region-free, 1 for region 1, 2 for region 2, etc. 4. Press PAUSE on the remote control. 5. Power off the player for few seconds. 6. Power on the player. Firmware Check: 1. Press Setup button on the remote control. 2. Select TV Aspect. 3. Place the cursor on 16:9 wide. 4. Using the remote control, key in the following: 1, 3, 9, 7, 1, 3, 9. 5. Press Enter on the remote control. 6. Press "SETUP" to clear the information once read. Method 2: Step 1

LG DV1000	Firmware update:
	http://www.area450.co.uk/lg5083hack.htm
LG DV2000	Step 1
	Download the file lg5000.zip by clicking on the link:
	http://www.area450.co.uk/images/LG5000.zip
	Step 2
	Unzip the file lg5000.zip. It will create a directory folder called RMTM0000.
	Step 3
	You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).
	Step 4
	You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc) to make a Data disc.
	Step 5
	I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.
	Step 6
	Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need! *** When burning the disc do not use DirectCD ***
	Step 7
	Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	"0" for multi-region and then ENTER. Power off and it's done!
	o for many region and their EryrExt. Fower on and its done.
LG DV8761	 Switch off the DVD player in to STB mode Open the DVD tray using the remote control Press "pause" in the remote Enter 0, 0, 0, 0 (zero 4 times) The display should indicate the regional code set in the DVD and prompts for the new regional code. Enter the new regional dode Press Pause to exit the setup Switch off the DVD using the remote and wait for a while before switching it on again.
LG DV8931H	1: Switch On the player 2: Press the "pause" button on the remote 3: Press "3" "1" "4" "1" "5" "9" on the remote 4: Now you can see your current region code on the TV screen. 5. Press "0" (for code free) on the remote (or any other region code). 6. Press "pause" on the remote. 7. Switch Off the player and wait for a few sec. 8. Switch On the player - done.
LG DV9723P	 Power on the player with no disc. Wait for the "No Disc" message to appear on the TV (not the player). Press Pause on the remote. Press 3, 1, 4, 1, 5, 9 on remote. Press 0 (region free) on the remote (or any other region number you want). You'll see the number on the player's display. Press Pause on the remote. Power off the player. Wait a minute. Power on.
LG DV9823P	With no disc on the tray 1. Power on 2. Press "Pause" on remote control 3. Press the keys: 3, 1, 4, 1, 5, 9 Appear in the display code then enter 0=All region 1=America 2=Europa 3=Asia

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Step 4

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc.

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need!

*** When burning the disc do not use DirectCD ***

Step 7

Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multi-region and then ENTER. Power off and... it's done!

LG LH-CX247W

- 1) Download the file Kpjc19_1.dvd from: www.math.uga.edu/~djb/html/kpjc19_1.dvd This file consisting of four bytes of data (hex 17 17 8C 00), ensure of this. If it's 5MB, you did something wrong and it doesn't work, it should be four bytes long.
- 2) Now create a folder on your desktop called RMTM0000 (that is 4 zeros at the end by the way all letters are upper case). Inside this folder create another folder called SCARLET, again all uppercase.
- 3) Now copy the kpjc19_1.dvd file from your desktop and paste it into SCARLET folder. Exactly as it was, do not rename it.
- 4) Now burn the RMTM0000 folder to a CD-R (I used a CD-R Princo, 700 MB, I burn it to a speed of 24x, and Nero software). Ensure that you born this as data CD and finalize/close the disc. 5) After this is finished place the CD into your player and close the try. You will get a blue screen telling you the unit is region 2, press 0 for all region, then press Pause button on your remote control, then power off the player, wait a few second and start the player. Now your player is region free.

You can get the same hack without doing all the folder thing if you download the file FreeZoneLG6053.exe from www.math.uga.edu/~djb/html/FreeZoneLG6053.exe It is a self-executing RAR format file. What you extract from this file is a disc image in BIN/CUE format. Use a CD burning program to create a CD this image. Don't just make a data CD with

	these two files on it. When you burn this CD you can find in it the same directory structure than you could read above. Now continuous with the step number 5, explained up
LG LH-D6230	Method 1:
	 Plug LG DVD player (no disc in tray) in and turn on with REMOTE. Wait for "NO DISC" message. Press the open button on the remote. Press the following sequence(using the REMOTE only) PAUSE, 3, 1,4, 1,5, 9 Wait for "CODE" to appear. Enter 0 (all regions) then press PAUSE then press POWER.
	The unit should turn off leaving it region free, but be warned that it have trouble with Region 0 discs. If so just redo the above steps and at "CODE" enter your region.
	Works beautifully for my LG LH-D6530 as well. You guys are life savers! Thankx
	Method 2:
	http://lgregionfree.tripod.com/menu.htm
	Chose the 6000 Series File and followed these instructions to the letter.
	6000 Series Region Set File.
	 Unzip the folders and files to the hard drive in exactly the same order. Burn the folder "RMT000" (including sub files and/or folders) to a blank CDR Make sure you set; 'close' disc and session Make sure you burn the disc in ISO mode (not joliet)
	Insert the disc in the player and follow the screen instructions
	Chose region 0 for Region Free.
	Now my Blade 2 Region 1 disks work alongside all my Region 2 Dvds.
LG LH-D6240	 Plug LG DVD player (no disc in tray) in and turn on with REMOTE. Wait for "NO DISC" message. Press the open button on the remote. Press the following sequence(using the REMOTE only) PAUSE, 3, 1,4, 1,5, 9 Wait for "CODE" to appear. Enter 0 (all regions) then press PAUSE then press POWER.
LG LH-D6245	Step 1: Turn on player without any CD inside. Step 2: Wait for the message "No Disc" to appear on the LCD.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

Now on the remote control

- 3 Press set-up
- 4 Select preferences menu
- 5 Press play
- 6 Input 251131
- 7 Press "Left" then "Down" button
- Should show region code menu
- 8 Select region free by hitting the 10/0 button, this will change the region to region free (ie 0)
- 9 Press set-up to confirm and exit.

Mintek MDP-1810

Method 1:

Insert DVD you want to play

Power ON

With remote control repeatedly press 1 until message "Wrong region"

(nota you can use 2,3, ... 9 too)

-> DVD start to play

You can turn off the message by pressing the 'Audio' button.

It's not perfect and you have no control of the dvd.

You even have to turn the player off just to stop it.

Method 2:

- 1. POWER ON
- 2. PRESS 'SET-UP' BUTTON
- 3. SELECT THE 'PREFERENCES' MENU (PRESS CENTER ARROW BUTTON THIS IS THE ENTER BUTTON)
- 4. INPUT THE PASSWORD CODE: 25 23 15

More code numbers: 251251 / 255135 / 253135 / 251251 / 251422 / 212425.

- 5. PRESS 'LEFT' AND 'DOWN' BUTTON (NOW THE SCREEN WILL SHOW 'REGION CODE 1')
- 6. PRESS NUMBER BUTTON (2 TO 6) TO CHANGE ZONE. (TRY 10/0 BUTTON FIRST IF EXCEPTED THEN PRESS SETUP, YOUR PLAYER IS NOW REGION FREE)
- 7. PRESS 'SETUP' BUTTON TO EXIT.

Mintek MDP-5860

Power on with No Disk in player.

Open player

Press "SETUP" button

Select "PREFERENCES" and press "ENTER"

Input the password "2 2 2 4 4 3" (more numbers: 242112, 221441, 224441, or 245512)

Press the "LEFT" and "DOWN" button

The screen should now show "REGION CODE 1"

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	Press the number button (2 to 6) to change zone
	Press "SETUP" button to exit
Mintek MDP-5861	Method 1:
	Press many time the botton "1" until start the First Chapter
	Land had MDD5061
	zone hack dvd MDP5861 01-power on
	02-press setup
	03-select preference setup
	04-input password 221441
	05- input code region 2-6 or "0" for all
	06-press setup
	ok
	Method 2:
	power on
	remove disk if it is installed
	left open cover
	press "setup"
	with control remote
	go to preference setup
	press "play or enter"
	press 221441 (more number: 242112, 224441, or 245512)
	press and release "lef arrow" press and release "down arrow"
	then appears "region x"
	then appears region x
Mintek MP-1710	1. Open & close the disc tray
	2. Push SETUP on the remote control
	3. Push 1, 3, 6, and 9, one at a time, on the remote control
	4. Push the left menu arrow button 3 times NOT the << or <> or >> button
	6. If you see a new menu item named "VERSION", enter that menu.
	(If you don't get the VERSION menu, then your player probably lacks the region menu. You may wish to try the method outlined in THIS message to "force" your player to play DVD's from other regions.)
	You should now see a screen that resembles the following:
	VERSION: 00.00.05.01

I assume you can press 1 - 6 to change to another region (but why would you want to do that!)

The player information can be brought up by opening the disc tray and pressing the "display" button on the remote.

The info my player gave me was:

"DVD623 171 V313 0206

Region 1 ATAPI VER: 412F"

The machine still boots with a region 1 listing, but reverts to whatever region you set it to when vou load a disc.

The region hack HAS NOT converted back after continuous power downs and disc changes.

I have the 623, it DOES do PAL->NTSC

if you are playing the PAL Movie, on the remote, hit setup, and find where Video Setup is, then Video Output

hit NTSC

and BOOM!

PAL->NTSC, no converter required!

Philips DVD 624AT **Method 1:**

open the cd trav press "1111"

and then "0" for all regions

in the tv screen you will see "new region"

Method 2:

open the cd tray press 7 8 9 OK 0

vou will see a small '0' on TV screen

Philips DVD 625

- 1. Turn on DVD with remote
- 2. Open tray using button on player
- 3. After a few seconds, type the button "9" on the remote control FOUR TIMES with about 1 second pause in between each time
- 4. About 1 second after the last "9", press the number corresponding with the region you would like to set your DVD Player to. 0 (zero) is for ALL Regions, i.e. "Region Free".

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	5. If you select to press "0" on your remote after the four "9"'s, "Region:0" is now displayed on screen (no on screen messages prior to this point.
	And that's it - I pressed "0" and my Philips DVD625 is now region free.
Philips DVD 626K	 Turn the player on. Open The Tray. Press 9 9 9 9 X The last number "X" indicates the region, use "0" for region free.
Philips DVD 627K	1. Turn the player on. 2. Open The Tray. 3. Press 9 9 9 X
	The last number "X" indicates the region, use "0" for region free. After the procedure you should see a message on the screen saying "region X", like "region 0" for region free.
Philips DVD 633	Open tray put the numbers 00000 on your remote and close tray. Have fun with your region-free DVD player
Philips DVD 634	1. Switch on the DVD and open the tray. 2. From remote . Press four times zero : 0000 + (the digit for corresponding region , e.g 1 for region 1 , 2 for region 2 and similarly 0 for region free (This means if u want region free settings then u need to press 00000 or for region 1 : 00001) 3. Message will be displayed on screen saying region 0 which means the DVD is region free !! 4. Thats it !! (U can check the region by open the tray and pressing the display button on the remote) Note: Havent checked the limitation of numeber of changes, which is 25 times!! But it u change it region free then it works OK, so don't try to paly with process.
Philips DVD 640	1.Open the tray 2. Press "0000" on your remote 3. Press "0" for zone free or "1" for zone 1 and 4. You can see the zone on the high left corner of your TV 5. close the tray to verify:
	1. Open th tray 2. press "display" on your remote

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

	3. you can see on the 2nd line "REG 0" for zone free, or REG 1 for zone 1, and
Philips DVD 700	First upgrade the firmware:
	try to get the latest firmware on the net and burn it onto a cd (unpack it if it comes into a compressed format (.zip, rar, etc)
	Power off the dvd, power on it again, open the tray, insert the cd with the firmware, close the tray (with close button, not play!)) If it works you will see it make the update on the lcd screen. Be patient, and wait until it open the tray. Now you are ready (just to be done once).
	Now the codes:
	Common: unload any cd from the tray, close the tray. Now on the remote control press 1,5,9,play
	Now the screen on the lcd is different (dashes) you can now enter those codes:
	For svcd,dvd,vcd Region 2: 001 000 128 156 (the last number is little)
	For Sved,dvd,ved Region 1: 005 000 128 156
	There is other numbers, but I don't know what is there meaning (what region or else) ecause I don't own other region'dvd.
Philips DVD 701	1. Press play 1, 5, 9 buttons on remote control
	2. Onscreen display 11 dashes ""
	3. Using remote cont. enter code 008 000 000 000
	4. Press play and after 3 seconds the screen turn blue then the player automatically switch off and on again
	5. That's it. It works!!
	6. For back region 2 same procedure but code 020 000 000 000
Philips DVD 702	1.Power on the unit with no disc.

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	2.Press "PAUSE" on the remote. 3.Enter "3 1 4 1 5 9" on the remote ("CODE 1" will be shown. "1" is the current region code). 4.Press "0" on the remote (0=AUTO, 1,2,=set region) 5.Press "PAUSE" on the remote. 6.Power the player off, and then back on
Philips DVD 703	Method 1:
	1. Press Play on the remote, followed by 1, 5 and 9. 2. When the display reads '' enter 005 000 128 156 using the remote. (Note the 12 digit code, when there are only 11 spaces This is normal, just enter the whole code, and press Play) 3. Press Play on the remote. Your player is now a region 1 only player.
	To return it to region 2 only do the following: 1. Press Play on the remote, followed by 1, 5 and 9. 2. When the display reads '' enter 002 000 128 156 using the remote.(Note the 12 digit code, when there are only 11 spaces This is normal, just enter the whole code, and press Play) 3. Press Play on the remote. Your player is now a region 2 & 4 only player.
	Method 2:
	To set the player in Region 1 press 'play' followed by 1,5,9. then enter the code 003 000 128 156 using the remote control. Press 'play'. The confirmation of the procedure it's a little blink in the screen. The background color change to blue.
Philips DVD 704	1.Power on the unit with no disc. 2.Press "PAUSE" on the remote. 3.Enter "3 1 4 1 5 9" on the remote ("CODE 1" will be shown. "1" is the current region code). 4.Press "0" on the remote (0=AUTO, 1,2,=set region) 5.Press "PAUSE" on the remote. 6.Power the player off, and then back on
Philips DVD 707	 Power on the unit. Press SETUP on the remote. Open the tray. Press code 8421 (the current zone will be displayed on screen). Press SELECT on the remote until zone 9 be displayed on screen. Close the tray.

	OK. Your DVD Player is zone free.
Philips DVD 711	Okay for those of you who have locked the philips dvd711 players due to wrongly coding here is the factory default code (maybe region 2 only) press play then 1,5,9 then 053 000 000 000 then press play again followed by the blue screen turn off the player and then turn back on If the player completely locks up - after an attempt to hack it - it is possible to reset it.
	are the player completely locks up after an attempt to mack it is possible to reset it.
	Try unplugging it and then connect the plug while holding the eject-button and the skipforward button. The display on the player will then flash briefly and it will appear to be dead. Then unconnect the player and connect it again - and it should work fine.
	If you connect the plug while holding the eject-button and the skipbackward button, the player will enter a display-test mode. When pushing the play-button, the display will alternate between 3 different patterns.
	If you connect the plug while holding the eject-button and the stop-button, the player will enter something that can be either a test-mode or a configuration-mode. When pressing the different buttons, the player will show a sequence of numbers depending on how many times you press a button.
Philips DVD 714	1.Power on the unit with no disc. 2.Press "PAUSE" on the remote. 3.Enter "3 1 4 1 5 9" on the remote ("CODE 1" will be shown. "1" is the current region code). 4.Press "0" on the remote (0=AUTO, 1,2,=set region) 5.Press "PAUSE" on the remote. 6.Power the player off, and then back on
Philips DVD 718	To play Region 1 dvd's using the remote supplied press Play 159 then 005 000 128 156 then hit play and you are set.
	To return to PAL press play then 009 000 000 000 then play again. That's it. Cheers.
Philips DVD 722	Method 1:
	remote hack

	1. Turn the machine ON and remove any discs.
	2. When the display shows 'NO DISC' 3. Enter 'Play', '159'.
	4. The display will change to show 11 dashes (''). 5. For region 1 enter the 12 digit code '005000128156',
	for region 2 enter the 12 digit code '002000128156'
	6. Press 'Play' and the screen will turn blue and then reset.
	Method 2:
	Press Play (on remote) followed by 159. The famous dashes will appear.
	Now enter:
	222 222 005 255 followed by play.
	Until now, nothing has changed with the other hacks. However the device will NOT reset. It will also not listen to any command entered by on the remote or the device itselft. Unplugging the mains and plugging again enters the normal state again.
	The device is now region code free!
Philips DVD 724	Open Tray Press 1 1 1 (pausing between each) Press 0 (new region 0 message appears) Close Tray
Philips DVD 724AT	1 * '
	Press 1 1 1 1 (pausing between each) Press 0 (new region 0 message appears)
	Close Tray
Philips DVD 725	- Power on the dvd player with no disc in tray.
	- Wait until display on dvd player says -No disc- - Open the tray pushing the button
	on dvd player front panel Press on remote control 9 9 9 9 0 (four times a nine
	followed by a zero) leaving approx. 1 to 2 seconds
	between each keypress.
	After pressing the 0, in the upper left
	corner of the TV screen the message 'Region:0' appears.

Philips DVD 737	2. Enter the following numbers slowly on the remote control "1111" - 'note you will see nothing on the screen' 3. Press "0" on the remote (take note of TV screen to ensure you select the right number. TV should show " New region 0" in top left hand corner of screen.) 4. Press "open/close" Process completed. power on your dvdplayer
Fillips DVD 737	open tray press menu press stop press << pre>press 0 for multiregion
Philips DVD 750VR	have tray out press 9 9 9 then 0(zero) slowly
Philips DVD 751	 Power on the unit. Press SETUP on the remote. open the tray of the player. Press code 8421 (should appear in the top left porion of the screen.) Press Select on the remote control and continue to press until the desired region is selected or 9 is displayed for region free. Press Close.
Philips DVD 755VR	Because the Philips DVd/VHS is actually a LG 5000 all i did was download the firmware for it from: http://lgregionfree.tripod.com/ NOTE - Download the Firmware for the LG 6000 not 5000 because the firmware for 5000 does not stay in the DVD players memory but the 6000 does. (Dunno WHY???) **What Happens** when you go to download the firmware it shows you pictures of all different LG's and when you see the LG 6000 it looks nothing like the Philips Combo, click on the oicture to start download Save the zip file to your PC create a new empty folder Unzip the zip file to that folder

	In the folder are 2 items a readme file and another folder.
	At this point all you have to do is burn that first folder (i think its called RMTM0000) to a normal blank cd using NERO or whatever burning program you got.
	REMEMBER ONLY HAVE THE ONE FOLDER ON THE DISK NOT THE README FILE. ALSO MAKE SURE THE CD IS CLOSED AND NOT ON MULTISESSION!!!
	NOW insert that CDR into the Philips dvd/VHS a blue screen will appear asking you to enter region code 0-6 ENTER 0 for multiregional then press Pause to exit
Philips DVD 761	You have to press play,the numbers 1 5 9, then 033 000 000 000 then play again. You'll have then to restart the dvd and miracle!
	It worked with my region 2 dvd, while anything else failed
Philips DVD 762	* Press "open" tray * Plug DVD into monitor or TV * Press "1111" * Press "0"(country code) * Press "open/close" to close tray

	4.Press "0" on the remote (0=AUTO, 1,2,=set region)
	5. Press "PAUSE" on the remote.
	6. Power the player off, and then back on.
	o.i ower the player off, and then back off.
Philips DVD 956	code "PLAY 159 101 040 000 140 PLAY"
	any undesired side effects - as missing sound and color option, not powering down SCART - everything works as supposed to work.
Philips DVD 972	(1) Power up / connected to TV (2) Press (Open/Close) (3) With tray open enter 27 with remote control
	(4) Press 0 (Country Code)(5) press (Open/Close) to complete process!
Philips DVD Q30	This DVD player (DVDQ30) is so easily, accidentally changed to a another region. To eject a DVD using the remote; repeatedly press 1. However, if you press it slowly while it's open, you've suddenly changed it to the Chinese-region! What a load of crap!!! Anyway, to change the region on purpose; 1. Open the DVD-tray. 2. Slowly type in the remote; 1, 1, 1, 1 followed by the region you want (0 = region free, 1 = asig, 2 = USA, 2 = aurone, 4 = Australia
	followed by the region you want. (0 = regionfree, 1 = asia, 2 = USA, 3 = europe, 4 = Australia, etc.). 3. Press 'display' on the remote to check the settings. The second line on the screen should be the
	region (reg). 4. Yippee, You've just changed the region settings and have rid yourself of the irritating "Wrong region" messages.
Philips DVD Q35	1. Press the tray "open" button on the DVD player. 2. Enter "1111" on the remote control. 3. Press "0" for region free. 4. Press "open/close" - ON TV SCREEN WILL CONFIRM MESSAGE "REGIN" Done!
	Note: On step 3. you can enter 0, 1, 2, 3,etc. for different region, but 0 is best because it is region free.
Philips DVD Q40	POWER UP UNIT AND CONNECT TO A TV(OSD ON TV REQUIRED) PRESS OPEN/CLOSE TO OPEN TRAY WITH TRAY OPEN ENTER 1111 WITH UNIT REMOTE PRESS 0 (COUNTRY CODE)

	(Note: You can only change 25 times the code!)
Philips DVDR880	Method 1:
	switch on the machine with no disc
	Set your remote to "DVD player" instead of "DVD recorder",
	Press PLAY 159
	at this point digits will appear on the DVD player, type in:
	121 212 005 001 and press play (for RC1) 121 212 005 002 and press play (for RC2) 121 212 005 003 and press play (for RC3) 121 212 005 004 and press play (for RC4) 121 212 005 005 and press play (for RC5) 121 212 005 255 and press play (for RC6)
M.II. DAMBOOO	
Philips DVDR890	I have a Philips dvdr890 I have all regions now I (1) I press play then 159 then play and I got on my dvd player.
	(2) then put the numbers in 121212005255 then press play and it came up no disk. Then I put the player into standby for one minute. and that on the philips remote that came with the 890 and all regions working ok now Phil Surrey
Philips DVDR990	Method 1:
	Power up the player with no disc on the tray. Change the remote controler type to be "DVD player" and then on the idle state press:
	"PLAY 159", (will appear) "121212005001" (for region 1), or: "121212005002" (for region 2), "PLAY"
	It seems that other codes, e.g. "121 212 005 255" or "222 222 005 255", to make the player completely region free do not work at all.

Press "System Menu" key to exit Set Up menu.
Philips DVP 5500S	Power up DVD player. Make sure there's no disc loaded inside the tray.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Then go to the system menu, select preferences. Enter 135566 with your remote and press ok. A region code selection will appear. Press up or down to select 0. Press ok and you now have a multi-region player :D
Philips DVP 630	 Turn on the player. Open the tray. Press the following sequence on the remote: 7 8 9 OK 0 The number 0 will appear on the lower left side of your screen. Your player is now region free! Put in a DVD and enjoy! :) NOTE: The 0 in the sequence above represents the region code. 0 = region free. If you want to change your player to just a specific region code, replace the 0 with the region number you want.
Philips DVP 632	for Codefree: turn on player and open tray use remote control to dial: 7 8 9 OK 0 (0 is region free, use desired region number) the number 0 will appear on the lower left side of your screen close tray and reboot
Philips DVP 642	Method 1:
	 Open the tray. On your remote press '0000'. Press '0' to make it region free or whichever zone you want to set it to. The newly selected region will appear on the top left corner of the screen. Close the tray.
	Method 2:
	Not exactly region free but you can change regions between 1, 2, 3 and 4 after the firmware update at philips web site:
	1) Open tray.
	2) On the remote press "5 6 9 OK"
	3) Use up/down arrows to select between model numbers (probably same player, different regions). The value at the far right is the region code. Choices (about 10) look like:
	VER0409 642/17 02 1 VER0409 630/00 01 2

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	4) Power down, then power up.
	I've played both region 1 and region 2 (both on an NTSC TV) using this method. I don't know if it works before the firmware update, but before the update the version (in the USA) was:
	VER0113 642/17 02 01
	Method 3:
	 Turn on the player. Open the tray. Press the following sequence on the remote:
	7 8 9 OK 0 4. The number 0 will appear on the lower left side of your screen. 5. Your player is now region free! Put in a DVD and enjoy! :)
	NOTE: The 0 in the sequence above represents the region code. 0 = region free. If you want to change your player to just a specific region code, replace the 0 with the region number you want.
Philips DVP 720SA	 Turn on the player. Open the tray. Press the following sequence on the remote: 9-9-9-9. The number 0 will appear on the lower left side of your screen. Your player is now region free! Put in a DVD and enjoy!
	NOTE: The 0 in the sequence above represents the region code. 0 = region free. If you want to change your player to just a specific region code, replace the 0 with the region number you want.
	Download the following packet and follow the instructions. http://lgregionfree.tripod.com/2005/Hacks/6000.zip Yes, it is for LG, but Philips has bought the DVD part for this machine from LG.
Philips DVP 762	1) Open tray. 2) Press the following sequence in the remote control:
	99990

- 1. Start up the player (in disc mode) with no disc in the tray. 2. Press Play on the player. 3. Press 159 023 793 90 on the remote. 4. Press Play on the remote. 5. You'll see a message flashing on your screen, saying something like "DVD player has been set to region 0" 6. When the image on the TV returns, power down the player. 7. Wait 10 seconds. 8. Start up the player again Method 2: I made it all region free by entering code from remote control... follow step by step: 1.NO disc in the tray 2.power on dvd 3.Press: region 1 => PLAY 1 5 9 1 1 1 0 0 2 0 8 PLAY region 2 => PLAY 1 5 9 2 2 1 0 0 2 0 8 PLAY Region 3 => PLAY 1 5 9 3 3 1 0 0 2 0 8 PLAY Region 4 => PLAY 1 5 9 4 3 1 0 0 2 0 8 PLAY 1. Start up the player (in disc mode) with no disc in the tray. 2. Press Play on the player. 3. Press 159 023 793 90 on the remote. 4. Press Play on the remote. 5. You'll see a message flashing on your screen, saying something like "DVD player has been set
- Philips LX3750
- You'll see a message flashing on your screen, saying something like "DVD player has been set to region 0"
- 6. When the image on the TV returns, power down the player.
- 7. Wait 10 seconds.
- 8. Start up the player again

I've tested it with region 1,2 and 4 discs, also with RCE checking discs, all played successfull. I've had to try it a few times, press the numbers not too quickly.

Philips LX3900SA

- 1. Light the reader of DVD
- 2. Press on the Open/Close button to open the drawer
- 3. Successively press on the buttons 9 9 9 9 (thus four times "9") of the remote control
- 4. Press on button 0 to pass in multizone, on button 1 to pass in zone 1 etc...
- 5. Again, press on the Open/Close button to validate and close the drawer

To open/Close the drawer with the remote control

	ver 2= region 2
	etc. press left or right on the remote to change
Provision PRDVD2.0	turn on the dvd player. open.
	then on the remote press 330880 wait for each hand to disappear. now the dvd player is region free
Provision PRDVD2166	Method 1:
	1.open the tray- press set up
	2.press the next key
	3. press the prev key
	4.press the next key
	5.press the prev key
	ver 255 = region free
	ver 1= region 1
	ver 2= region 2
	press left and right to change
	And so on
	Method 2:
	first turn on the dvd player and open the player.
	to hack the region code press the following code:
	0 3 3 0 8 8
	after pressing each number wait till the hand dissappears
	if you did it correctly a message R0 will appear
Provision PRDVD3100	1) Turn on the player. 2) Press EJECT and leave tray open.
	3) Type 8806 on remote.
	4) Now a secret menu will show.
	5) Choose region 9 (1=region 1, 2=region 2, etc. 9=REGIONFREE)
	6) Skip to Macrovision and turn it OFF! 7) Enjoy!!
Qwestar MVP360	WHEN YOU INSERT THE DISC PRESS 2 then SKIP>

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	It will set the region as 2!!!!!
Radionette RN6500	1. Press the "power"-button on your remote, to turn the player ON, and wait till the "no disk" is shown in the display.
	2. Press "pause/step"
	3. Press 3 1 4 1 5 9
	4. The display will now show: "code _"
	5. Press your choice of region, 0 for region-free.
	6. Press "pause/stop" on your remote.
	7. Press "power"-button on remote to turn the player off.
Radionette RN6502	Step 1
	Download the file lg5000.zip by clicking on the link:
	http://www.area450.co.uk/images/LG5000.zip
	(If you have any problems downloading the file e-mail me and i will send it to you: nunomiranda80@hotmail.com)
	Step 2
	Unzip the file lg5000.zip. It will create a directory folder called RMTM0000.
	Step 3
	You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).
	Step 4
	You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow,windows xp etc) to make a Data disc.

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Step 5 I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R. Step 6 Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need! *** When burning the disc do not use DirectCD *** Step 7 Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. Power off and... it's done! Radionette RN8502 You'll need an empty CD-R, a CD burner and a file which you can download here below Step 1 Download the file lg5000.zip by clicking on the link: http://www.area450.co.uk/images/LG5000.zip (If the link doesn't work, try copying it to the address bar and clicking "Go") (If you have any problems downloading the file e-mail me (the original poster of this hack) and i will send it to you: nunomiranda80@hotmail.com) Step 2 Unzip the file lg5000.zip. It will create a directory folder called RMTM0000. Step 3 You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).

To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Step 4

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, windows xp etc....) to make a Data disc.

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need!

*** When burning the disc do not use DirectCD ***

Step 7

Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then OK. Turn the player off and... it's done!

Note: I just copied this from another hack from this list, I am NOT the one you'll be e-mailing if you can't download the file

**2nd Note: I don't think that it matter what kind of CD-R is used or what speed it's written at, mine worked with a Mr. Platinum CD-R (700MB) and I burned it at 8x

Raite AVPhile 711

- 1. insert DVD disc.
- 2. play the disc.
- 3. press "stop"
- 4. press "setup"
- 5. press direction key and move the arrow to item "preference"
- 6. press "play"
- 7. press left "skip"
- 8. press right "skip" then you will see a star symbol on the top right connor of the screen.
- 9. press "play"
- 10. press right direction key.
- 11. press "setup"

	Then to free region you have to do:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Like regulating the code region of reader MPEG4:
	1, Turn Ont he reader without to insert some disc
	2, press key UP for two times 3, press key DOWN for two times
	4, press key RIGHT once
	5, press key LEFT once
	6, press 0(zero) for regulating on
	all the regions (press key 2 in order to select area 2) 7, press key ENTER in order to confirm.
	8, Reset the DVD
Roadstar DVD- 2010H	Method 1:
201011	- power up the player
	- wait for "no disc"
	- press 7, 7, SELECT (or ENTER)
	Method 2:
	This is a new model available in Europe (esp.in Switzerland)
	To make it Region-free:
	1. Make sure no disc is inside the tray and tray is closed (it doesn't matter even if it is open)
	2. Press SETUP 3. Press NEXT, PREV, NEXT, PREV in order.
	4. Now you'll see "Ver x" (where x is the Region code)
	5. Now press RIGHT to browse through the regions 1-6, after the region 6, if you press again then
	it will show region 255
	6. Press SETUP again to save the settings with the Region 255. This will now play all the regions. Enjoy!
Roadstar DVD-	press "setup"
2013H	then 1,3,6,9
	now in the setup menu you can see a new voice:
	"version"
	press and insert the region code (0 for all)
Roadstar DVD-	turn on the DVD, then you have to OPEN the DVD tray
2014H	1. Press the setup button on the remote control.
	2. Using the remote control, key in the following: 1, 3, 6, 9. 3. Press left button in the middle three times.
	4. Press the right button in the middle once
	1 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	5. A new column will appear in the bottom of the display, called "version".6. Move the cursor to choose the version then change the code number by pressing up and down on the remote, with 0 being region-free.
Roadstar DVD-2019	Method 1:
	1. press "SETUP" 2. press "1369" 3. press 3 x "LEFT" 4. press 1 x "RIGHT" 5. now you see a new option in the setup screen "version" 6. open the new option and chose the line with the actual region code 7. press "ENTER" 8. change region code with "UP" / "DOWN" (0 = code free) 9. Press "SETUP" to save 10. Restart player
	Method 2:
	 Open tray Press setup ON THE PLAYER (ie. not on the remote) press right, left, right, left You should see "Ver X" on the screen (where X is region code) Use the right button on the remote to change region, 255 is for region free Press setup again Turn off the player
Roadstar DVD- 2020H	Open the drawer, or make sure there is no dvd in it. Press 7 - 7 - Enter on your remote and you will stumble upon the secret menu. Here you see the region code and the macrovision setting. My particular player was set on region 13 which seems to be regionfree. If yours came set on region 2, you can change it here. If you have a newer region 1 DVD which is not fooled by region free setting, set it to region 1 here. I did not test a region 1 DVD, however I set it to Region 1 and my region 2 DVD bounced, saying "wrong region code" so it appears to work. With "return" you can exit the menu again.
Roadstar DVD- 2025H	- Open the DVD door by press "Open/Close" - Type in the code 330880 - You will see on the screen "R0" - Close the DVD door by press "Open/Close" Now will be your DVD-Player Region free.

for Region 6 use 2, 4, 4, 6 and 2

A code should be displayed on the screen indicating the current Region setting of your unit.

Press the 9 button on your remote control for Region free, or 1 for Region 1, 2 for Region 2 and so on.

Press the Open button on your player

Press the Standby button on your remote control

Method 2:

Turn dvd on

Open the Trav

put whatever disc in u want to play

but dont close the tray

press 0, 1, 2, 3 and PLAY on the remote

as easy as that

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	give it a few goes incase it dont work first time
Samsung DVD-A500	On remote control:
	1.press "repeat" or "index" 2.For region 1 press 2, 9, 3, 3, 4 For region 2 press 3, 8, 7, 6, 7 For region 3 press 5, 6, 7, 3, 2 For region 4 press 7, 6, 8, 8, 4 For region 5 press 5, 3, 8, 1, 4 For region 6 press 2, 4, 4, 6, 2 3.Press "9" for multiregion. 4.Press "OPEN" on front panel. 5.Press "POWER" on front panel.
Samsung DVD-C637	 Make sure that there is no disc in the tray and switch on the player. Cold start the player, by holding down the PLAY and STOP buttons on the player. You should see a set of language options. Release the PLAY and STOP buttons. Select your language. Press REPEAT then the following codes for the required region the player is already set to (region you bought the player in): Region 1 - 2, 9, 3, 3, 4 Region 2 - 3, 8, 7, 6, 7 Region 3 - 5, 6, 7, 3, 2 Region 4 - 7, 6, 8, 8, 4 Region 6 - 2, 4, 4, 6, 2 A code will appear, indicating the region setting of your player. Press 9 for region-free, or 1 for region 1, 2 for region 2, etc. Wait for the selected region character to disappear off screen and the player will now fuction as changed.
Samsung DVD-CM- 350	Always perform a COLD START before applying the hack below. This is an essential step. 1. Power on your player as normal. 2. Press and hold both the Play and Forward buttons on the player. 3. After a short while the words "No Disc" should appear from the onscreen display. Release the Play and Forward buttons on the player. 4. First press the "Subtitle", then press the "Repeat" button on your remote control. 5. Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate: - Region 1 use [2, 9, 3, 3, 4]

	egio.cbay.com/ws/cbay15A1 1.dii. viewschersotheritems&dserid=best.scher_1
	- Region 2 use [3, 8, 7, 6, 7] - Region 3 use [5, 6, 7, 3, 2] - Region 4 use [7, 6, 8, 8, 4] - Region 5 use [5, 3, 8, 1, 4] - Region 6 use [2, 4, 4, 6, 2]
	 6. A code should be displayed at the upper left of the screen showing the current Region setting of your unit. 7. Press the "9" button on your remote control for Region free, or "1" for Region 1. Press "2" for Region 2, and so on. 8. Press the Open button on your player, put a DVD movie. Don't press CLOSE!!! 9. Press the Standby button on your remote control. 10. Press Standby again, and wait untill u see the Samsung Digitall logo, press the PLAY button, and here you go, your movie should start now.
	Note: steps 1~3 are the COLD START steps. Steps mentioned in 4~10 are the region hack code. Also, make sure that there is no DVD in the unit while doing the hack.
Samsung DVD- CM250	Cold start the DVD player (disconnect from the mains for 30 seconds). Don't know if this step is essential - Had tried many ways & this was the 1st step I tried during this particular hack attempt so I will add it in as a step. Feel free to experiment!
	Power on from the remote control with no DVD in drawer.
	Press the subtitle button.
	Press the following 768849 via the remote (only have a couple of seconds so type in quickly - 76884 is the Region factory code on the Australian DVD player (Region 4), the 9 added in at the end of this code sets the player to multiregion
	Press subtitle button.
	Open drawer.
	Close drawer.
	Power off.
	Turn player on thru remote & insert DVD - Should now play anything U throw at it!! (Not Literally!!)
Samsung DVD-E137	-on the remote control

- 2. Press the "Repeat"button. The "no disc" label on the screen will disapear.
- 3. According to the region your player was bought in, choose from the following button sequences.
- region 1, press buttons 2, 9, 3, 3, 4
- region 2, press buttons 5, 7, 5, 3, 8
- region 3, press buttons 5, 6, 7, 3, 2
- region 4, press buttons 7, 6, 8, 8, 4
- region 5, press buttons 5, 3, 8, 1, 4
- region 6, press buttons 2, 4, 4, 6, 2
- 4. The number in the top left corner of the screen shows you the current region. EG "1" for the US/Canada, "4" for Australia/NZ.....etc.
- 5. Now enter the new number for the region you require (1 to 6)...or simply enter 9 for "Multi-region". The number in the left hand corner of the screen will change to the number you enetered. Wait for the number to dispear. It will take around 15 seconds.
- 6. Now power off the DVD player with the button on the front of the unit. Now each time the unit is turned on it will be in the new region...or muti-region if region 9 was chosen.
- 7. If you wish to change the region again...or back to its original, go through the exact same sequence until step 5. Then you enter the different region number.

4. Press the 1 button on your remote control for region 1, 2 for region 2, and so on, or 9 for multiregion playback

NB: The above step may be time sensitive and need to be performed quickly

- 5. Open your DISC tray and leave open for 15 secs.
- 6. After 15 seconds have elapsed, power off your player and the DISC tray will be closed and player shut off.
- 7. Power on player and your it is now set to the new region code you chose in step 4 above.

Samsung DVD-HD841

Method 1:

Remove any disk from the player. Read the message NO Disk. Press repeat 76884789. Open the tray and insert a different region disk.

Method 2:

- 1. Turn on player with no disc in the tray. "No disk" appears on screen.
- 2. Press the "Repeat" key on the remote.
- 3. Press "57538" on the remote. A number should appear on screen, indicating your player's current region (e.g. "2").
- 4. Press the number for your required region (e.g. "1") or "9" for region-free/all-regions. The number will appear on screen, replacing the previous number (from step 3).
- 5. Press "Open/Close Tray" and leave the tray open for a few seconds.
- 6. Press "Power On/Off". The tray closes automatically and the player turns off. Next time you turn it on, it is region free (or whatever Region you selected in step 4).

Method 3:

- 1. Turn your television ON
- 2. Turn the DVD Player ON

(You should see the Samsung screen saver appear on the TV)

- 3. Ensure the DVD tray is EMPTY and CLOSED
- 4. Wait for the message 'NO DISC' to appear

IMPORTANT: Use the remote control supplied with the player to perform the following functions:

- 5. Press the ANGLE button
- 6. Press the numbers 4, 3, 2, 7

(You should see the message 'HDCP Free' appear in the upper

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

left hand corner of your television screen)
7. Press the OPEN/CLOSE button to open the disc tray
Your DVD player is now region-free and HDCP-free!

Samsung DVD-HD850

Method 1:

- 1. open dvd tray
- 2. press "info/select" button then "Servo adjustment complete" message will be shown on the display
- 3. press "9", then all LCD segment on your DVD will light up
- 4. press "9" again, now the LCD shows "open"
- 4. close the tray

That's it. Enjoy Region free DVD

If you want see the region code, press "quit" button, then it will show you the region code BUT NOTE THAT IT WILL RESET THE REGION CODE 9 BACK TO WHERE YOU STARTED (in my case 1). It says that it performed some sort of cold start. So you have to start from hack step 1 again.

Method 2:

- 1. Turn on the Player with no disc on the tray. The tv screen and the dvd lcd will display "No Disk"
- 2. Press the "Repeat" key on the Samsung remote control
- 3. Press the keys: "5 7 5 3 8" on the remote. A number must appear n the screen. That is your player's current region.
- 4. Prss the number for the region you want to use next (1, 2, etc). If you want your dvd player to be unlocked for all the regions press "9". A number should appear in the screen.
- 5. Press the "Open/close" button in the remote. The tray will open. Leave it open for a few seconds.
- 6. Just press the "On/off" button in the remote.
- 7. Congratulations: You now have a multi-region dvd player

- 4. Input 76884 (This hack is for Australia, check out the E137 hack as these numbers will probably work in other countries).
- 5. Input 9 to activate multi-zone.
- 6. Open and close disc tray once.
- 7. Turn power off and then back on again. It's done.

Samsung DVD-HD941

Method 1:

- 1. Turn on player with no disc in the tray. "No disk" appears on screen.
- 2. Press the "Repeat" key on the remote.
- 3. Press "57538" on the remote. A number should appear on screen, indicating your player's current region (e.g. "2").
- 4. Press the number for your required region (e.g. "1") or "9" for region-free/all-regions. The number will appear on screen, replacing the previous number (from step 3).
- 5. Press "Open/Close Tray" and leave the tray open for a few seconds.
- 6. Press "Power On/Off". The tray closes automatically and the player turns off. Next time you turn it on, it is region free (or whatever Region you selected in step 4).

Method 2:

1)Turn on your DVD player;

2)Open the disc deck

You will need a remote control from an AIWA sound system with the keys Repeat, Program DON'T CLOSE!

- 3)Press Repeat
- 4)Press 29334 (for region 1 players)

Now using the DVD remote control

- 5)Press 9
- 6)Turn off the player.

Method 3:

You will need a remote control from an AIWA sound system with the keys Repeat, Program (PRGM) and Clock.

Turn on your DVD player;

Open the disc deck.

DON'T CLOSE!

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Using the AIWA remote control.

- 1) Press Repeat (DVD player's display will be totally light.)
- 2) Press Program.
- 3) Press Clock and the display will show the word "ADJUST".

At this time using the DVD remote control press 9.

DVD deck will close.

Method 4:

Note: Make sure the 941 is off. Make sure there is no DVD in the drive.

Using the 941 remote:

- 1. Turn the player on.
- 2. Press the OPEN/CLOSE button. The drive door will open.

Using the Harmony remote:

- 3. Press the DEVICE button.
- 4. Press the NEXT button until the "Mini System (DVD)" device appears next to one of the soft buttons.
- 5. Press the "Mini System (DVD)" soft button.
- 6. Press the NEXT button until "Repeat" appears next to one of the soft buttons. (I had to press the NEXT button seven times to cycle through the choices.)
- 7. Press the "Repeat" soft button.
- 8. Press the NEXT button until "Program" appears next to one of the soft buttons. (I had to press the NEXT button eight times to cycle through the choices.)
- 9. Press the "Program" soft button.
- 10. Press the NEXT button until "Clock" appears next to one of the soft buttons. (I had to press the NEXT button three times to cycle through the choices.)
- 11. Press the "Clock" soft button.

The player's LCD will display "ADJUST". There was also a brief mention of something about a 'servo adjustment complete' on the TV.

I used the 941's remote to press "9" (as others have instructed), but this didn't have a visible effect. The drive door did not close. Doesn't hurt to do it, I suppose.

12. Using the buttons on the player, close the drive door and power it down.

Upon powering up the 941, I could play other regions' DVDs. I also double-checked that my own region's DVDs still played ok.

I added the HD-941 to my Harmony remote and both it and the player itself have been working

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	great!
	Note: Since the Harmony emulated the *functions* of the Aiwa remote and not the actual *buttons*, I did not need to emulate or press a SHIFT key prior to pressing the Harmony's Repeat, Program, and Clock soft buttons.
Samsung DVD- HD945	 Turn on player with no disc in the tray. "No disk" appears on screen. Press the "Repeat" key on the remote. Press "57538" on the remote. A number should appear on screen, indicating your player's current region (e.g. "2"). Press the number for your required region (e.g. "1") or "9" for region-free/all-regions. The number will appear on screen, replacing the previous number (from step 3). Press "Open/Close Tray" and leave the tray open for a few seconds. Press "Power On/Off". The tray closes automatically and the player turns off. Next time you turn it on, it is region free (or whatever Region you selected in step 4). If the above doesn't work, on Step 3, replace the "57538" with "53814"
Samsung DVD- HD948	Power on the SAMSUNG DVD-HD948 player with no disc in tray. 1. Press the Repeat button on your remote control Do not confuse this with the Repeat A-B button 2. If your player was purchased in Region 1, press the buttons 2, 9, 3, 3 and 4 on your remote control, in order one at a time If it was purchased in Region 2, press the buttons 5, 7, 5, 3 and 8 on your remote control, in order one at a time For Region 3 players, press the buttons 5, 6, 7, 3 and 2 on your remote control, in order one at a time For Region 4 players. press the buttons 7, 6, 8, 8 and 4 on your remote control, in order one at a time For Region 5 players, press the buttons 5, 3, 8, 1 and 4 on your remote control, in order one at a time For Region 6 players. press the buttons 2, 4, 4, 6 and 2 on your remote control, in order one at a time 3. The numbers "02" or similar current region code will be displayed on the top left of your TV onscreen display

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

- 4. Press the 1 button on your remote control for region 1, 2 for region 2, and so on, or 9 for multi-region playback. NB: The above step may be time sensitive and need to be performed quickly
- 5. Open your DISC tray and leave open for 15 secs.
- 6. After 15 seconds have elapsed, power off your player and the DISC tray will be closed and player shut off.
- 7. Power on player and your it is now set to the new region code you chose in step 4 above.

Samsung DVD-HD950

Method 1:

- 1. HDCP-Free: Requires only DVD Remote.
- 2. Power On DVD player, wait until "no disk" display
- 3. Press "Angle"
- 4. then number on the remote "4", "3", "2", "7"
- 5. TV Screen displays "HDCP Free"
- 6. Press "Angle" to turn off the "HDCP Free" display
- 7. Try 1 more time from step 1-6 (HDCP Free will display)

Removing the HDCP also turn the DVD-HD950 into region free player, I tried the repeat + code trick...it doesn't work, then I tried the Angle + code and the TV screen shown "HDCP Free". I put in a Region 3 disc...it play, swap region 1 disc...it play too, owesome!

Method 2:

- 1. Turn on the Player with no disc on the tray. The tv screen and the dvd lcd will display "No Disk"
- 2. Press the "Repeat" key on the Samsung remote control
- 3. Press the keys: "5 7 5 3 8" on the remote. A number must appear n the screen. That is your player's current region.
- 4. Prss the number for the region you want to use next (1, 2, etc). If you want your dvd player to be unlocked for all the regions press "9". A number should appear in the screen.
- 5. Press the "Open/close" button in the remote. The tray will open. Leave it open for a few seconds.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

	6. Just press the "On/off" button in the remote.
	o. Just press the On/on button in the remote.
	7. Congratulations: You now have a multi-region dvd player
Samsung DVD-L100	Method 1:
	Switch ON your player with no disk inserted. Use AIWA audio system remote (my is RC-7AS09) press "clock" twice "region free" appears on the LCD screen. You can now play any region until you switch the player OFF, with new restart the process has to be repeated.
	Method 2:
	Press and hold REPEAT at the same time press UP and DOWN and RIGHT and LEFT.
	03 will appear on screen
	Press DOWN until 09 appears.
	Press REPEART AB
	OPEN and CLOSE DVD cover
	Switch Power OFF.
	Done.
	1) Turn on your player 2) With no disk inside press repeat on your remote (do not press repeat ab) . Repeat is a separate button 3) Press up arrow 4) Press down arrow 5) Press rigt arrow 6) Press left arrow 7) by now you will see a number on the screen. 8) now press the up arrow button until you read the number " 9 " on the screen 9) press the " repeat ab " button
Samsung DVD-L300	Method 1:
	1.) No disc in machine. 2.) Power On.
	1

- 3.) Use remote, and press REPEAT (not Repeat A-B)
- 4.) Then, use the arrow keys in this order:

UP DOWN RIGHT LEFT

- 5.) A little 2 (or 1 / your region) will appear
- 6.) Use up key to change to change this to 9 (multi-zone)
- 7.) Press REPEAT A-B (Not repeat)
- 8.) Happy Watching!!!

Samsung DVD-M103 Method 1:

Turn the equipment (M301) On.

Open the Disk Tray.

Press Sleep in the Aiwa remote, after that you will see the cold start screen in the TV.

Press Clock three times Very Quickly between pressing and pressing, After this you will see an Adjusting Message in the M301 LCD Screen.

Put the Disk you wanna watch and close the disk tray, no matter what region it is, it will Play.

Method 2:

- 1. Press the Repeat button on your remote control
- 2. Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate

for Region 1 use 2, 9, 3, 3 and 4

for Region 2 use 3, 8, 7, 6 and 7

for Region 3 use 5, 6, 7, 3 and 2

for Region 4 use 7, 6, 8, 8 and 4

for Region 5 use 5, 3, 8, 1 and 4

for Region 6 use 2, 4, 4, 6 and 2

- 3. A code should be displayed on the screen indicating the current Region setting of your unit.
- 4. Press the 9 button on your remote control for Region free, or 1 for Region 1, 2 for Region 2 and so on.
- 5. Press the Open button on your player
- 6. Press the Standby button on your remote control

Samsung DVD-M104 Method 1:

on the aiwa remote:

first press the repeat button once you have the screen will be a little brighter then press the programme button.

followed by the clock button several times sometimes quite a few.

then on the player display should appear ADJUST!

get the samsung remote and press which ever region it is you want to play...

the drawer should close automatically now and play the disc...

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

thats it

Method 2:

Make sure there is no disk in the tray.

Press Repeat (not repeat A-B)

Then type in, using numbers on your remote

57538 (there are other numbers quoted under the m105 thread if this does not work).

If it works for your model, 02 should appear in the top left hand corner, where the numbers you have typed in appear.

This shows the region your model is currently on.

Before these numbers dissappear type 9 (or 09) and press the Open/Close button on your remote, quickly after, to save it.

Then press standby on the remote.

Samsung DVD-M105 Method 1:

switch the player off and on. Held the play and stop buttons (for 10 seconds) just as it came up (but this didn't seem to do anything). I then did the following.

- 1. Press the Repeat button on your remote control
- 2. Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate

for Region 1 use 2, 9, 3, 3 and 4

for Region 2 use 3, 8, 7, 6 and 7

for Region 3 use 5, 6, 7, 3 and 2

for Region 4 use 7, 6, 8, 8 and 4

for Region 5 use 5, 3, 8, 1 and 4

for Region 6 use 2, 4, 4, 6 and 2

- 3. A code should be displayed on the screen indicating the current Region setting of your unit.
- 4. Press the 9 button on your remote control for Region free, or 1 for Region 1, 2 for Region 2 and so on.
- 5. Press the Open button on your player
- 6. Press the Standby button on your remote control

Method 2:

To make the player an ALL-REGION player!

- 1 Power on.
- 2 Press the open/close button, the cd-tray will come

out, remove dvd of other cd if present.

3 Press REPEAT button once.

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

4 Enter following numbers: 38767

You will then see '02' on the TV-Screen

5 Press button number: 9

6 Press the open/close button.

7 Power off, then on and start viewing dvd's from

whichever region you want.

Method 3:

Make sure there is no disk in the tray.

Press Repeat (not repeat A-B)

Then type in, using numbers on your remote

57538

If it works for your model, 02, should appear in the top left hand corner, where the numbers you have typed in appear.

This shows the region your model is currently on.

Before these numbers disappear

Press the Open/Close button on your remote, to save it.

Then press standby on the remote.

Method 4:

- 1. press the repeat button on remote control. (don't confuse with A-A button)
- 2. press the buttons 5,7,5,3 and 8 on remote control, in order one at a time
- 3. the numbers 02 will be displayed on the top left of your onscreen display
- 4. press the 1 button on your remote control for region 1, 2 for region 2 and so on, or 9 for multi region playback. NB. the above step may be time sensitive and need to be performed quickly.
- 5. press the open button on remote control.

NB: the above step may be time sensitive and need to be performed quickly.

6. after 15 seconds have elapsed, power off you player and then power on.

- Samsung DVD-M108 1. Make sure that there is no disc in the tray and switch on the player.
 - 2. Cold start the player, by holding down the PLAY and STOP buttons on the player.
 - 3. You should see a set of language options. Release the PLAY and STOP buttons.
 - 4. Select your language.
 - 5. Press REPEAT then the following codes for the required region the player is already set to (region you bought the player in):

Region 1 - 2, 9, 3, 3, 4

Region 2 - 3, 8, 7, 6, 7

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

("E series M105", M205 and M305 users try: 57538) Region 3 - 5, 6, 7, 3, 2 Region 4 - 7, 6, 8, 8, 4 Region 5 - 5, 3, 8, 1, 4 Region 6 - 2, 4, 4, 6, 2 6. A code will appear, indicating the region setting of your player. 7. Press 9 for region-free, or 1 for region 1, 2 for region 2, etc. 8. Press OPEN/CLOSE on the Player to open the disc tray. 9. Press STANDBY (POWER) on the remote control to close the tray. Next time the player is turned on it will set to the region specified. If the player halts on the FBI Warnings, press Forward Search x2 or faster. Samsung DVD-M203 1. Make sure that there is no disc in the tray and switch on the player. 2. Cold start the player, by holding down the PLAY and STOP buttons on the player. 3. You should see a set of language options. Release the PLAY and STOP buttons. 4. Select your language. 5. Press REPEAT then the following codes for the required region the player is already set to (region you bought the player in): Region 1 - 2, 9, 3, 3, 4 Region 2 - 3, 8, 7, 6, 7 ("E series M105", M205 and M305 users try: 57538) Region 3 - 5, 6, 7, 3, 2 Region 4 - 7, 6, 8, 8, 4 Region 5 - 5, 3, 8, 1, 4 Region 6 - 2, 4, 4, 6, 2 6. A code will appear, indicating the region setting of your player. 7. Press 9 for region-free, or 1 for region 1, 2 for region 2, etc. 8. Press OPEN/CLOSE on the Player to open the disc tray. 9. Press STANDBY (POWER) on the remote control to close the tray. Next time the player is turned on it will set to the region specified. If the player halts on the FBI Warnings, press Forward Search x2 or faster. Samsung DVD-M204 With no DVD inserted and the player switched on: press "repeat" on remote control press "38767" on TV is displayed a code then press "9"

	insert a DVD and play it
Samsung DVD-M205	Method 1:
	*Turn on your T.V.
	*Turn on your DVD
	*Press the OPEN/CLOSE button on the DVD-player
	*Press on the REPEAT-button on your remote
	*Press 38767 on your remote
	(02 disapear on your t.v. screen)
	*Press 9 on your remote control(press it when 02 disapears)
	(9 disapear on your t.v. screen)
	*Press the OPEN/CLOSE-button on your remote
	*Press the STANDBY-button on your remote
	Method 2:
	1. Power on your player.
	2. Press and hold both the play and the stop buttons
	on the player.
	3. After a short while you should be presented with a
	set of language options. Release the play and the
	stop buttons on the player.
	4. You will now need to select a language option
	between 1 and 6.
	5. Press the repeat button on your remote control.
	6. Using your remote control enter the code below,
	note that you must know what Region your player is
	currently set to in order to know which sode is
	appropriate. * for Region 1 use 2,9,3,3 and 4.
	* for Region 2 use 3,8,7,6,and 7.
	* for Region 3 use 5,6,7,3 and 2.
	* for Region 4 use 7,6,8,8 and 4.
	* for Region 5 use 5,3,8,1 and 4.
	* for Region 6 use 2,4,4,6 and 2.
	7. A code should be displayed on the screen
	indicating the current Region setting of your unit.
	8. Press the 9 button on your remote for Region free,
	or press 1 button for Region 1, button 2 for
	Region 2 and so on.
	9. Press the open button on your player.
	10. Press the standby button on your remote control.

	(If the player sticks on FBI warning screens,then press forward search x2 or faster, the disc should skip straight to the main feature.)
Samsung DVD-M301	You can do it using an Aiwa Remote or a Configurable remote with sleep and clock buttons, setting it to control an Aiwa receiver. The Trick is: Turn the equipment (M301) On. Open the Disk Tray. Press Sleep in the Aiwa remote, after that you will see the cold start screen in the TV. Press Clock three times Very Quickly between pressing and pressing, After this you will see an Adjusting Message in the M301 LCD Screen. Put the Disk you wanna watch and close the disk tray, no matter what region it is, it will Play. The Hack will work as long as the equipment is kept on, after you Turn the M301 off, it will go back to its initial state (it will ask for the language every time you do a Cold Start).
Samsung DVD-M305	1. Turn on your T.V. 2. Turn on your DVD 3. Press and hold both the play and the stop buttons on the player. 4. After a short while you should be presented with a set of language options. Release the play and the stop buttons on the player. 5. You will now need to select a language option between 1 and 6. 6. ! Press the open/close button, the cd-tray will come out, remove dvd of other cd if present (no disc) 7. Press the Repeat Button (not the Repeat A-B Button) 8. Using your remote control enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate. * for Region 2 use 57538 (not displayed on the screen indicating the current Region setting of your unit. 10. When it disappears press the 9 button on your remote for Region free. 11. Press the open button on your player. 12. Press the standby button on your remote control. 13. GOTOWE!!

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

Samsung DVD-M403 1. - Remove any disc from your dvd and player de power up 2.- press REPEAT on the remote control 3.- Enter the following numbers: 76884 (a number will now superimposed over Samsung logo, on your TV) 4.- Now press the number of the region: 1 = region 12 = region 29 = region free (the best) 5.- press OPEN/CLOSE button 6.- press the red DVD POWER button 7.- power the player back and insert a disc of your choice. Samsung DVD-M405 1. Without any discs inserted, POWER ON the player. Press and hold at the same time PLAY and STOP buttons on the player. A language menu should appear after a few seconds. 2. Press 1 for English (or the number corresponding to your preferred choice of language). Apparently this resets your DVD player and is allegedly a good thing to do before applying hacks. 3. Press REPEAT on the remote. (NOT the "REPEAT A-B" button). 4. If your DVD player is: Region 1 coded type: 2 9 3 3 4 Region 2 coded type: 5 7 5 3 8 Region 3 coded type: 5 6 7 3 2 Region 4 coded type: 7 6 8 8 4 Region 5 coded type: 5 3 8 1 4 Region 6 coded type: 2 4 4 6 2 (So if your dvd player only plays dvd's that are region 2 coded you would type 5 7 5 3 8)

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

in the upper left corner of the screen, e.g. "02". 6. Quickly, before it disappears press 9 for all regions, or you can choose region 1-6 if you want. 7. Press OPEN/CLOSE. The tray will open. Wait for 15 seconds. 8. Press POWER OFF and wait for 15 seconds before turning back on. If you pressed 9 earlier you're now the proud owner of a region free Samsung DVD-M405 player! Samsung DVD-MC20 Make sure there is no disk in the tray. Switch on the machine. When the NO DISC message appears on screen press Repeat (not repeat A-B) on the remote (NB. this must be done before the message disappears) and type in the numbers 57538 using your remote. 3. Select your language.

4. Press REPEAT (not the repeat A-B button) then the following codes for the required region the player is already set to (region you bought the player in):

Region 1 - 2, 9, 3, 3, 4

Region 2 - 3, 8, 7, 6, 7

Region 3 - 5, 6, 7, 3, 2

Region 4 - 7, 6, 8, 8, 4

Region 5 - 5, 3, 8, 1, 4

Region 6 - 2, 4, 4, 6, 2

- 5. A code will appear, indicating the region setting of your player.
- 6. Press 9 for region-free, or 1 for region 1, 2 for region 2, etc.
- 7. Press OPEN on the Player to open the disc tray.
- 8. Press STANDBY (POWER) on the remote control to close the tray. Next time the player is turned on it will set to the region specified.

Enjoy!

The Samsung DVD-P247A that I bought at Pick 'n Pay in South Africa did not react to the region 2 hack of REPEAT / 3,8,7,6,7 -- it produced a "no disc" display.

When I did a REPEAT 5,7,5,3,8 it displayed a 2, which could be overwritten with a 9, and then open the CD carrier, wait a second or two, then power off, caused the 9 to be stored.

Samsung DVD-P248A

Method 1:

- 1. Cold start the player, by holding down the PLAY and STOP buttons on the player.
- 2. You should see a set of language options. Release the PLAY and STOP buttons.
- 3. Select your language.
- 4. Press REPEAT (not the repeat A-B button).
- 5. Press 5-6-7-3-2
- 6. Press 9 for region-free.

use 5, 3, 8, 1 and 4

Method 2:

- 1. Turn VIDEO on TV set on.
- 2. Turn DVD player on.
- 3. Press "open" button and make sure the DVD

tray is empty

4. On Remote Control, press "Repeat" button.

Do not confuse yourself with the "Repeat A-B" button

5. Press the numbers on your remote control 56732

with accuracy.

6. Your region code 3 should appear on the upper left

corner of your TV screen.

- 7. Press number 9 on your remote control.
- 8. Wait for 10 seconds.
- 9. Open Tray from the player.
- 10. Turn Power off from remote control.
- 11. redo step 1-5 to see results (if 9 comes out instead of 3, than you did it!).. If not.. Try and try again..

Samsung DVD-P433 1.- Turn on your DVD.

- 2.- It is recomended to select appropriate language by pressing your native language.
- 3.- You have to wait in the screen appears "NO DISC" message
- 4.- With no disc in the plate, to press REPEAT A-B in the remote control.
- 5.- After that, you have to press the next number sequence with the control remote buttons:
- 7 6 8 8 7

(it must appear number 4 in the screen)

- 6.- Inmediatly press "9".
- 7.- Open the plate disc with the remote control.
- 8.- Insert DVD disc zone 1.
- 9.- To press "DVD Power" button (on the DVD player).
- 10.- Turn on the device again for the changes have been recognized.

Samsung DVD-P450 | Method 1:

- 1. Power on your player with no disc in the tray. Wait for message "No Disc" in the top left hand corner of your screen.
- 2. Press and hold the Repeat button on your remote control for approximately 5 seconds.
- 3. Enter the code below. (Note that you must know what Region your player is currently set to in order to know which code is appropriate.)

for Region 1 use 2, 9, 3, 3 and 4

for Region 2 use 3, 8, 7, 6 and 7

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

for Region 3 use 5, 6, 7, 3 and 2

for Region 4 use 7, 6, 8, 8 and 4

for Region 5 use 5, 3, 8, 1 and 4

for Region 6 use 2, 4, 4, 6 and 2

- 4. The message "No Disc" will now be replaced with the default region number of your player. For example, Australian and N.Z players will display a small "4".
- 5. Press "9" for multi-region.
- 6. Open tray and insert your title.
- 7. Close tray.

The player will continue to hold the changes you have made. If this does work for you the first time, keep repeating steps 2&3 until the players default region number appears. The amount of time holding the repeat button does seem critical.

Method 2:

- 1) Power on the dvd and remove CD/DVD.
- 2) Power off
- 3) Power on and wait until it says "No Disc"
- 4) Press the following buttons:: Repeat, 5, 7, 5, 3, 8
- 5) If you've done the above steps correctly, your current region code will appear at the top left.
- 6) Click 1 for region 1, 2 region 2, 9 for multi region. For more see this ::

http://hometheaterinfo.com/dvd3.htm

- 7) Press the eject button to open the tray
- 8) Press the power button. The tray should close and the player should go stand-by mode.
- 9) Power-on your player and enjoy, hopefully!

Samsung DVD-P543K

- 1. Disconnect the dvd.
- 2. Connect the dvd again.
- 3. Make sure that there is no disc in the tray and switch on the player.
- 4. Cold start the player, by holding down the PLAY and STOP buttons on the player.
- 5. You should see a set of language options. Release the PLAY and STOP buttons.
- 6. Select your language.
- 7. Press REPEAT then the following codes for the required region the player is already set to (region you bought the player in):

Region 1 - 2, 9, 3, 3, 4

Region 2 - 3, 8, 7, 6, 7(or 57538)

Region 3 - 5, 6, 7, 3, 2

Region 4 - 7, 6, 8, 8, 4

Region 5 - 5, 3, 8, 1, 4

Region 6 - 2, 4, 4, 6, 2

- 8. A code will appear, indicating the region setting of your player.
- 9. Press 9 for region-free, or 1 for region 1, 2 for region 2, etc.

- 5. After you enter the 5-digit number a number indicating your current region number will appear in the upper left corner of the screen, e.g. "02".
- 6. Quickly, before it disappears press 9 for all regions, or you can choose region 1-6 if you want.
- 7. Press OPEN/CLOSE. The tray will open. Wait for 15 seconds.
- 8. Press POWER OFF and wait for 15 seconds before turning back on. If you pressed 9 earlier you're now the proud owner of a region free Samsung DVD-S128 player!

If the power is unplugged for some hours you might have to reapply the hack. Some say that this hack can only be applied a maximum of 5, 15 or 25 times, but as a power surge seems to reset it, I doubt there's any such limitations.

Samsung DVD-S221 Method 1:

All you need is a Aiwa Stereo remote control.

Open the DVD tray and put the DVD you want to play.

Don't close the tray. Instead, press "clock" on the Aiwa remote 3 times very quickly. The display will show "Adjust". Then just press play and enjoy your movie! You will have to do this trick every time you turn on the player. It will ansk you to select a language the next time you turn it on but this is normal. Also all the configurations will be reset to factory defaults.

Method 2:

- 1. Press REPEAT in the RC (Remote Control);
- 2. Press the sequence 5,7,5,3,8;
- 3. On the upper left corner will appear the region code.
- 4. Choose from 1-6 for respective region or 9 for region free;
- 5. Press OPEN on DVD's panel to open the tray;
- 6. Wait for 15 seconds;
- 7. Press POWER on the RC (The tray closes) and the DVD player turns off;
- 8. Press POWER to turn on the DVD player.

Samsung DVD-S222 All you need is a Aiwa Stereo remote control.

Open the DVD tray and put the DVD you want to play.

Don't close the tray. Instead, press "clock" on the Aiwa remote 3 times very quickly. The display will show "Adjust". Then just press play and enjoy your movie! You will have to do this trick every time you turn on the player. It will ansk you to select a language the next time you turn it on but this is normal. Also all the configurations will be reset to factory defaults.

- Samsung DVD-S223 1.- Power on DVD
 - 2.- wait message "No Disc"

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

3.- press "repeat"

4.- press =>7=>6=>8=>4

5.- wait that clear number on screen

6.- press quickly 9

7.- open with remote control

8.- insert disk zone 1

9.- press "stand by/on"

10.- power on DVD

11.- ready

Samsung DVD-S224 Method 1:

Make sure the disc tray is empty, press repeat on remote followed by 5,7,5,3 and 8 (one at a time in order).

The numbers 02 will appear in the top left of the screen. Quickly press the number button (1 for R1, 2 for R2, 9 for multiregion, etc) then press the open button on the remote. After 15 seconds turn the power off, then on again and you're sorted!!

Method 2:

*USE YOUR REMOTE FOR THIS PROCESS.

- 1. Turn DVD player on with no disc inserted.
- 2. Press "REPEAT" once on your remote control.
- 3. If your DVD player is:

Region 1 coded type: 2 9 3 3 4

Region 2 coded type: 3 8 7 6 7

Region 3 coded type: 5 6 7 3 2

Region 4 coded type: 7 6 8 8 4

Region 5 coded type: 5 3 8 1 4

Region 6 coded type: 2 4 4 6 2

*So if your dvd player only plays dvd's that are region 1 coded you would type 2 9 3 3 4

4. Then press 9 on your remote control.

Wait 10 seconds.

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

6. Turn power off.

*YOUR "SAMSUNG DVD-S224" IS NOW REGION CODE FREE AND CAN PLAY ANY DVD FROM ANY COUNTRY.

Method 3:

- 1) Turn on the player. Make sure the tray is closed and no disc is inserted. The Samsung logo should be visible on the TV screen.
- 2) Hold down the PLAY and STOP buttons on the front panel of the player. Within a few seconds, a language select screen should appear. Press 1 (on the remote) for English.
- 3) The Samsung logo should reappear, with the message "No Disc" on the screen and/or in the front panel display. Now, press the following buttons, on the remote, in sequence:

REPEAT, 5, 7, 5, 3, 8

Press them slowly and deliberately, but not too slowly (if you're unsure, about one button press per second is adequate). Don't take any notice of what appears on the TV screen while you're doing this. (Also, make sure you press the actual REPEAT button and *not* A-B REPEAT.)

- 4) *After* you've finished the button sequence, the number "02" should be visible in one corner of the TV screen. This indicates your currently set region.
- 5) Press 9 on your remote the number will change to "09" then *immediately* press OPEN/CLOSE on the remote to open the tray. (You *must* press OPEN/CLOSE before "09" disappears from the screen.)
- 6) Wait at least 15 seconds then press POWER on the remote - the tray will close and the player will go into standby mode. Wait at least another 15 seconds then press POWER again to turn the

	player back on.
	player ouch on.
	You should now be able to play discs from any
	region.
Samsung DVD-S225	1) Turn on the player. Make sure the tray is closed and no disc is inserted. The Samsung logo should be visible on the TV screen.
	2) Hold down the PLAY and STOP buttons on the front panel of the player. Within a few seconds, a language select screen should appear. Press 1 (on the remote) for English.
	3) The Samsung logo should reappear, with the message "No Disc" on the screen and/or in the front panel display. Now, press the following buttons, on the remote, in sequence:
	REPEAT, 5, 7, 5, 3, 8
	Press them slowly and deliberately, but not too slowly (if you're unsure, about one button press per second is adequate). Don't take any notice of what appears on the TV screen while you're doing this. (Also, make sure you press the actual REPEAT button and *not* A-B REPEAT.)
	4) *After* you've finished the button sequence, the number "02" should be visible in one corner of the TV screen. This indicates your currently set region.
	5) Press 9 on your remote - the number will change to "09" - then *immediately* press OPEN/CLOSE on the remote to open the tray. (You *must* press OPEN/CLOSE before "09" disappears from the screen.)
	6) Wait at least 15 seconds then press POWER on the remote - the tray will close and the player will go into standby mode. Wait at least another 15 seconds then press POWER again to turn the

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	player back on.
Samsung DVD-S228	*USE YOUR REMOTE FOR THIS PROCESS.
	1. Turn DVD player on with no disc inserted.
	2. Press "REPEAT" once on your remote control.
	3. If your DVD player is:
	Region 1 coded type: 2 9 3 3 4
	or, Region 2 coded type: 3 8 7 6 7
	or,
	Region 3 coded type: 5 6 7 3 2
	or,
	Region 4 coded type: 7 6 8 8 4
	or,
	Region 5 coded type: 5 3 8 1 4
	or,
	Region 6 coded type: 2 4 4 6 2
	*So if your dvd player only plays dvd's that are
	region 1 coded you would type 2 9 3 3 4
	4. Then press 9 on your remote control.
	5. Press Open button on the remote control.
	6. Wait 10 seconds.
	7. Turn power off.
	*YOUR "SAMSUNG DVD-S228" IS NOW REGION CODE FREE AND
	CAN PLAY ANY DVD FROM ANY COUNTRY.
Samsung DVD-S323	Method 1:
	nress reneat, then 76884
	press repeat, then 76884 2 times open/close
	and power off
	Method 2:
	1 Power on DVD
	2 wait message "No Disc"
	3 press "repeat"
	4 press =>7=>6=>8=>4
	5 wait that clear number on screen
	6 press quickly 9

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

7.- open with remote control

8.- insert disk zone 1

9.- press "stand by/on"

10.- power on DVD

11.- ready

Method 3:

First, unplug and plug again the player, then press play button on the player and hold it, press the stop button (on the player too) and hold it, the player will power on automatically. You will now need to select a language option in the menu that appears.

Now, press the repeat button on the remote control (if are two buttons, use the button that haven't the "a-b" mark), after this, press the secuence number according to the region code that have your player currently:

Region 1 use 2, 9, 3, 3, 4

Region 2 use 3, 8, 7, 6, 7

Region 3 use 5, 6, 7, 3, 2

Region 4 use 7, 6, 8, 8, 4

Region 5 use 5, 3, 8, 1, 4

Region 6 use 2, 4, 4, 6, 2

After this press 9

press "open/close" button on your player

press "power" button in your remote control

Ready.

Samsung DVD-S324 1) leave disc tray empty

2)press repeat

3) press 57538

4) a "2" will appear on the top left hand corner of the screen

5) press number 9 (this is for multiregion, apparently if you press 1, you get region 1, press 2 you get region 2 etc)

6)press open button

7) power off after 15 seconds

8) power on and youre in da zone :-D

Samsung DVD-S325 Power on your player whilst pressing hold both the FF and Pause buttons on the front player After a short while you should be presented with a set of language options. Release the Play and Stop buttons on the player

You will now need to select a language option between 1 and 6

To convert this player to Multi-Region playback:

SEG Hollywood III	Press POWER to power on the player Press EJECT to open the tray While the tray is open, press DISPLAY to enter setup menu Press the following four DIGITS to enter password (1, 1, 1, and 1) Press SELECT
	Press DIGITS from 0 to 6 to enter new region code 0: MULTI-REGION 1 to 6: REGION 1 to REGION 6
	A message OK is displayed on the TV.
	You can verify the new settings by: closing the DISC TRAY (no disc is displayed on the tv set) The type MENU and 1,3,5 and 7 you will be able to see if the change is done.
SEG Las Vegas	Press Display and 7-4-2-0. Information of version is shown. Press 9 to select region code. Press 0 to all.
SEG San Diego	Press the following key-combination on remote control: Menu 7 4 2 0 The software- and hardware-configuration appears. Then press: 9 0 A little zero appears on the right corner above of your TV. Your San Diego DVD-Player is now region-free!
Sharp DV-620H	1)TURN ON THE POWER 2)PRESS SETUP 3)PRESS THE KEYS 38883 OR 37774 SHOULD WORK
Sharp DV-740	write a small text file as follows TSDVDREG-2001-8939912-R0(0 for region 0, or R1 etc. for region you want)write this text file to a CD as CREGIN.TXT and hey presto!!! if you want to change back just use the same but use (R1,R2 etc.)I am told this works.
	write this: TSDVDREG-2001-8939912-R0 (but write R1 R2 etc. for whatever region)to a notepad file, save as CREGIN.TXT and burn onto cd, insert this disc into your sharp DV-740, it will make a noise as though it is scanning a disc then in the bottom left hand corner will appear the region to which the player is set, to change back from region to region you will have to first turn the dvd player off then insert the disc, this definitely works with regions 1 and 2.

	,
	In actual fact there are a variety of hacks for the DV740 depending upon where you bought the player (which is, incidentally, made by Sampo). (A) DV740U (US, Canada): Multiregion (should bypass RCE too) Open up Windows Notepad or similar text editor, and type in, or copy and paste "TSDVDREG-2001-9629735-R0" (without the quotation marks - do not hit the carriage return either!). Save the file as CREGIN.TXT. Burn to CD-R as ISO9660 Mode 1(do not use DirectCD). Insert in player. After 15 seconds or so "R0" should appear in the lower left hand corner of your TV screen. (B) DV740X (Aus, NZ, Singapore): Same procedure, except sequence is "TSDVDREG-2001-8918448-R0" (C) DV740H/DV740S (UK, Europe):
Sharp DV-760	see sharp DV-740.
Sharp DV-S1H	1. Power ON 2. Open 3. 3,3,0,8,8,0 4. (Ro appears on screen or similar) 5. Close 6. Power off
Sharp HT- CN400DVE	open drawer on dvd then press volume + key while holding it down press the language key and release volume+ still holding language then look then use up and down arrow keys to change region code.
Sharp HT- CN500DVH	open drawer on dvd then press volume + key while holding it down press the language key and release volume+ still holding language then look then use up and down arrow keys to change region code.
Sherwood VD-4106R	Press the Pause button on your Remote Control Using your Remote Control enter the code 3, 1, 4, 1, 5 and 9 Press the 0 button on your Remote for Region free, 1 for Region 1 or 2 for Region 2 Press the Pause button on your remote control Power off your player and wait a few seconds Power on your player

	then press x button 7 times
	only on english ps2
Sony Playstation 2	Method 1:
	-No hardware required (so also no empty memorycard) -Works on pal and ntsc -Ssimply load cd, select region, insert DVD and play -Play all region DVD titles including RCE
	-And it's 3 times cheaper then DVD region X
	Only problem is that it doesnt work with the newest ps2 console: 39003
	Method 2:
	Press O x 2 times Press R1 x 5 times Press X x 7 times
Sony RDR-GX210	Go to http://www.home.no/trsolhei/ and download the file for called: Sony AVD-LS10.ZIP
	Extract and burn to CD-R with SCARLET as the main directory on the disk. Turn the DVD-player on, put in disk and select region 0 when asked and press ENTER, now your GX210 is region free.
Sony SLV-D350P	1)No disc & tray closed 2)Once the "Insert disk" message in the top-left side of the screen appears, press (in the remote) the Subtitle key and continue with 29334 in sequence. 3)A number(1 in my case)appears in the top-left side of the screen. I believe that this number represents the region code of your DVD equip. 4)Change the number by typing number 9. 5)To save press the "open/close" key and then Enter (small one at the top. Not the big one at the bottom!!) 6)Now check if it works. NOTE: Other way to check if the change was successful, is to repeat steps 1 to 2. You should then see a 9 in top-left side of the screen.
	changing region to 0. 0 means region-free.
Sony SLV-D900	Turn on power with no disc inserted and tray closed

Step 1

Download the file lg5000.zip by clicking on the link:

http://www.area450.co.uk/images/LG5000.zip

Step 2

Unzip the file lg5000.zip. It will create a directory folder called RMTM0000.

Step 3

You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).

Step 4

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc.

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need!

*** When burning the disc do not use DirectCD ***

Step 7

Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. The unit will eject the disc and turn off by itself when you close the door. Turn it back on and your set!

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

Thomson DTH-7000E

Method 1:

For multi-regional DVD playback, highlight Options in the Set-up menu (with the tray open), then key in 8, 2, 1, 3, 9, then 'OK'.

If the above doesn't work, Don't enter in Options menu, just highlight it.

Method 2:

Follow this instructions exactly:

Step 1

Download the file lg5000.zip by clicking on the link:

http://www.area450.co.uk/images/LG5000.zip

Step 2

Unzip the file lg5000.zip. It will create a directory folder called RMTM0000.

Step 3

You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).

Step 4

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc.

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need! *** When burning the disc do not use DirectCD ***
	Step 7 Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. The unit will eject the disc and turn off by itself when you close the door. Turn it back on and your set!
Thomson DTH- 8040E	Highlight 'System Options' Key in with remote 8,2,1,3,9,then press 'OK'
Thomson DTH8043E	Turn ON player. Press Eject. Press Menu Highlight System Options Press 8, 2, 1, 3, 9 + OK
Thomson DVD-430T	1.Make sure that there is no disk in DVD player and the tray is closed. 2.Press MENU,1,6,7 on remote. Player will ask you to enter region number. Press 1-6 for specific region selection or MUTE for multi-region. 3.Turn the player off. 4.That's it.
Tokai 205N	You open the drawer of the DVD reader using the button on the front panel (do not use the remote control!). Then compose the following code with the remote control: 33080. If it doesn't work try 89260. You should see XXXX or 0 on the screen meaning you
Tokai 3500AT	While the tray is open, type "3838" on the remote control. A menu appear, allowing you to select the region code, and to disable the macrovision (depending on the firmware)
Tokai 823	setup (reglages) 3 8 8 8 3 select bypass (all/toutes zones)

Toshiba SD220E

u need to dload the rar file at http://www.geocities.com/its_yahell/sd220e.rar to get your region 2 Toshiba sd220e region free. It works great. This is what you need to do

- Download the rar file at the link provided by Labman
- Unpack it using WinRAR
- Start Nero Burning ROM, click File, click Burn Image..., select the .cue file, click open, disable 'Determine maximum speed' and 'Simulation', at write method select Disc-at-once (this is very important), click write.
- Push setup on the SD220e remote control, select under picture:

PAL/Auto: Auto. Push setup again.

- Open your SD220e disc tray and insert the CD.
- Close the disc tray.
- The disc will be read and recognised as a VCD, you'll see the image on your television flash and after a short while you will not see any image at all. Wait about 10 seconds and take out the CD.
- Your player is now region free. Tested it with a region 1 DVD and it worked great.

Toshiba SD2300

Method 1:

- 1. Download the RAR file (linked provided by Faisal. http://www.geocities.com/its_yahell/sd220e.rar
- 2. Unpack RAR file using for example Win-Rar. http://www.win-rar.com/index.php?lang=eng
- 3. Start Nero Burning ROM You can use a Demo version (http://www.nero.com/en/index.html#root)
- Click File (Recorder version 6)
- Click Burn Image...
- Select the .CUE file
- Click open, disable 'Determine maximum speed' and 'Simulation', at write method select Discat-once (this is very important), click write. (by Jez Bown)
- 4.- Push setup on the SD-2950 remote control, select under picture: PAL/Auto (or NTSC/Auto): Auto. Push setup again.
- Open your SD-2950 disc tray and insert the CD.
- Close the disc tray.
- The disc will be read and recognised as a VCD, you'll see the image on your television flash and after a short while you will not see any image at all. Wait 10 seconds and take out the CD.
- 5. Your player is now region free. Tested it with a region 1 DVD and it works!

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Note: Some RCE (Region Code Enhanced) discs detect when a DVD player is set to "multi-region" (bypass) and display an error message accordingly. If this happens the easiest solution is to select the region code setting options and select the region code for the RCE disc (usually region 1) – the disc will then play. The region code will again have to be set to "bypass" to play other region discs.
United DVR-5076	 Power on, then open the CD door (keep the CD door open) Press the following numbers "0086000" on your remote control Press the key "Select" Now your unit is switched to Code Free.
United DVX 4066M	Turn on power. Press arrow up twice. Press arrow down twice. Press arrow right once Press arrow left once Press 0 (for region free, else region number) Press Enter. Done. Tested and verified There is a new version with a chipset Ess.Press setup,then step,prev,next.You are in a hidden menu,where you can see your firmware(41121 or 41221)and bypass the region check.
United DVX 4067	1. Press "OPEN" to open the tray and leave it open 2. Press "SETUP" in order to enter the setup menu 3. Go to the "Preference page" in the setup menu 4. Write code 49540 5. Choose region by pressing the up and down buttons. 6. Confirm the region by pressing "PLAY" You have now selected a new region (You can check current region and firmware version by entering 49540 in setup menu on General page)
United DVX 4069	Switch on the player with the remote control. Open the CD tray. There must be no CD or dvd in the player. Push Setup on the remote control, go to the menu factory settings (I think in english it is named like that) without pushing it. push quickly 1379 on your remote. A new menu opens. With pushing arrows up or down you can select the region code 0 for example.
United HDV 4080	1. Press the power on, without disc in tray and press the set in TV/AV mode;

	4/ press the enter key until "9" is shown.
	5/ press menu to exit.
Venturer STS75E	Turn on the device Eject the tray Press 8,1,3,2,8 on the remote
	You'll get a menu that lets you select (by repeatedly pressing the 'enter' button) a region. Region 9 is region-free.
Venturer SVP580	Press Open from the remote. Enter 2405915 A new menu appears with the region number. Press enter until the region required appears or select 9 to have muli-region. Press Close
Vestel DVD-2216	This player is equal to all of these players: SEG Hollywoos2/BeverlyHills/LasVegas/LosAngeles, Centrum Libra/C100/Gemini, Universum 8120, Metz DG71/DH71, Vestel 2210/2216/2300, Bluesky 100/2210, Roadstar 2031H They only differ in whether the analogue 5.1 audio plugs are present or not. Al well, some come with a different case. However, all of them run with the same operating software. In order to update your player with a new and patched firmware (codefree, mactovision free), you
	first have to make sure what chipset and maybe what mainboard version there is. The info screen tells you the chipset: press (open) (menu) (7) (4) (2) (0). This brings up the info

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller 1

screen tellung you the firmware version etc, what looks like this:

Player Version: STCinemaster 3.388 - Vestel 3.06b9 Driver Version: 401, Build 706-Configurable-1

Region Code: Configurable, All

Drive Type: Type 0-ATAPI, DVS-LDRDSL-710A, LT37

Memory Config: 8192KB SMI, 0KB EMI, 5519

Audio DAC: CS4335-3

Chipset:

Main decoder chip: Take a look at the line 'Memory Config' and look at the end of the line. This tells you whether your player works with the 5508 chip or the 5519 (like shown above).

Audio DAC chip: Take a look at the last line. It tells you the name of the chip, in this case it's the 'CS4335' and how many of them are present. '-3' means that there are 3 of them (that's the case for my 5.1 player with 3 stereo(2-channel)-Audio DACs which makes 6 channels).

Drive Type: Look at that line. It should be an ATAPI device anyway. Almost every player around comes with a DVS drive 'DSL-710A'. The drive's firmware (not that one of the dvd player) is shown at the end of the line. Here, it's 'LT 3.7'.

If the menu shows 5508 for the chipset (or it doesn't show 5519), then it's bad luck for now. There's no new firmware available for the time being.

If it shows 5519, then you may have either a mainboard maked '12MB03' (older players) or '12MB04' (all the recently manufactured). You may open you dvd player case and look for yourself or just try the update: if you've got massive picture problems, it was a 12mb03 and you have to modify the firmware before you try the update again.

(The version information is printed on the mainboard on right side near the big chip (plugs facing backwards). It may be hidden partly under a label, but you most likely see the '04' (in case it's a 12MB04).)

Mainboard 12MB04:

Just downoad the latest firmware version for 'SEG BeverlyHills2' from this page: www.veseg.de. Then download the latest version of the tool abconf from www.powerglitch.com.

Unpack the firmware to a separate folder. You may have to remove the write protection for the file 'hws.ab'.

Start abconf. Press load and select the requested files of those you've just unpacked.

Now you can apply the modifications:

AudioDAC:

select the right audio DAC type:

AUDIO/dac/{'cs4335' or whatever your player has, see above}

then the right count of DAC chips:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

ļ l	(just choose it on the Audio DAC shortcut on the right, or do it manually by changing the entry ba hand:)
	AUDIO/dacnum/{'1' or '3' or whatever you have seen on the info screen, see above}
	RegionCode: GENERAL/region/{mark the current setting and click the right butten. Then change the value to '0' for codefree}
	Macrovision: (just choose disable on the macrovision shortcut on the right, or do it manually by changing the entry ba hand:) VIDEO/macrovision/{click on 'disable'}
	Misc: Enable audio output during fast-forward/rewind of cd audio and mp3 playback: NAVI/CDDA/audioscan/{select 'enable'}NAVI/MP3/audioscan/{select 'enable'}
	then, click save and burn the files to a cd-r/-rw. Note that you may have to add a junk data file of about 4050MB (e.g. any 'song.wav'). This may be neccessary because some drives do have problems with an otherwise too narrow data track.
Vestel DVD-2410	Press 7-7-Play
	Change Conutry Code to "0"
	Press POWER to power on the player Press EJECT to open the tray
	While the tray is open, press DISPLAY to enter setup menu Press the following four DIGITS to enter password (1, 1, 1, and 1) Press SELECT
	Press DIGITS from 0 to 6 to enter new region code 0: MULTI-REGION 1 to 6: REGION 1 to REGION 6
	A message OK is displayed on the TV.
	You can verify the new settings by: closing the DISC TRAY (no disc is displayed on the tv set) The type MENU and 1,3,5 and 7 you will be able to see if the change is done.

Yelo 800 DVD	Method 1:

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

press remote keys in this order- open-setup-mute-last-next-this opens the service menu where you can select ALL regions and also switch off the macrovision

Method 2:

Press "EJECT, SETUP, MUTE, LAST, NEXT" buttons one after another and you will be given a Factory Control Page where you should select the Region ID option. Here you should find it set to REGION BYPASS. (Which you would normally leave it on).

You need to change it to Region 1 in order to view the RCE discs. Reset the player to REGION BYPASS when you have finished viewing and wish to view any other Region Disc.

Yukai DVD-520

Method 1:

With the player switched on simply press SETUP

Next press the Volume buttons on the remote control as follows Plus + Minus - Plus + Minus - and now on the top right hand corner of your TV screen will be VER 2 this tells you your player is currently set to Region 2

Using the big blue left and right buttons as shown in the picture you can change the region code from 1 to 6 and also 255, with 255 being region free and should be selected, then press SETUP twice to finish... Your DVD player is now a MULTI REGION player!

Method 2:

- 1.Power up DVD without a disk
- 2. Press setup on the remote
- 3.On the player press next,prev,next,prev. Region code should be displayed on top right corner of screen. Use the keys on the remote to:
- 4. Use left/right arrow keys to change region code to 255.
- 5. Press down arrow. 3001 should be displayed. Use left/right arrow to change to 3000.
- 6. Press down arrow. 4001 should be displayed. Use left/right arrow to change to 4000.

Step 4 sets region free. Steps 5 & 6 set macrovision off.

Yukai DVD-V300

Method 1:

- 1) make sure you don't have any DVD inserted and Door Closed
- 2) IN remote control:
- 3) press SETUP
- 4) IN the Front Panel:
- 5) press NEXT
- 6) press STOP
- 7) press PAUSE/STEP

The region hack for the LG 5083 works perfect on this unit, and probably any other zenith model.

This is the multiregion Hack for the Zenith DVD Players. (should work on most models, tested on DVB216)

Follow this instructions exactly:

Step 1

Download the file lg5000.zip by clicking on the link:

http://www.area450.co.uk/images/LG5000.zip

Step 2

Unzip the file lg5000.zip. It will create a directory folder called RMTM0000.

Step 3

You need a CD Writer to write a new disk with the files you've just unziped (RMTM0000 folder).

Step 4

You need a CD burning software (like Easy CD Creator, Nero, CD Clone, HP RecordNow, etc....) to make a Data disc.

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need!

*** When burning the disc do not use DirectCD ***

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	Step 7 Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. The unit will eject the disc and turn off by itself when you close the door. Turn it back on and your set!
Zenith DVC2200	 Power on the player with no disk in the drive Press "PAUSE" on the remote Enter "3 1 4 1 5 9" on the remote (the word COdE appears on the display) Enter "0" on the remote (0 = All Regions, 1 = Region 1, 2 = Region 2, etc.) Press "PAUSE" on the remote Power the player off and then back on
Zenith DVC2550	No disk in player Turn on player press "pause" then 3,1,4,1,5,9 "CODE" will be in view enter desired region code press "pause" turn off unit for 5 - 10 seconds turn back on
Zenith DVD2201	Multi Region Hack 1. Power on the player with no disk in the drive 2. Press "PAUSE" on the remote 3. Enter "3 1 4 1 5 9" on the remote (the word COdE appears on the display) 4. Enter "0" on the remote (0 = All Regions, 1 = Region 1, 2 = Region 2, etc.) 5. Press "PAUSE" on the remote 6. Power the player off and then back on
Zenith DVD2381	 Turn On your player with NO disc in drive. Press "Pause" on your remote control. Enter the following on your remote control "3,1,4,1,5,9" until the word "CODE" appears on your screen. Now press "0" on your remote control to play ALL REGIONS, "1" for just REGION 1, etc Finally press "Pause" on your remote control and turn off your player few seconds. Power the player back up and your player should now play multiregion discs.
Zenith DVD5201	Power of player press pause

This NON RESELLABLE document has been brought to you by: Best.Seller_1 @ eBay
To find more items sold by me, go to:

	3. enter 3,1,4,1,5,9
	4. press 0 (0 = All Regions, 1 = Region 1, 2 = Region 2 ect)
Zenith DVR413	Do this, but only ONCE doing it twice DISABLES MULTI-REGIONS (my tips in brackets):
	1) Insert Any other Region DVD Film (not Region 2) [N.B.: I popped in a Region 2 and it worked]
	2) Wait until Player Rejects/Ejects the Disc (you can leave it open)
	3) Press '0' seven times [ZERO/NAUGHT 7 TIMES]
	4) Select Yes when presented with "Congratulations, Region free?" [Enter Button]
	5) Power Off Player
	This hack can be found at: http://lgregionfree.tripod.com/menu.htm http://lgregionfree.tripod.com/DR4810.txt
	Scroll down to Recorder. Although it's the DR4810 which is pictured, it looks IDENTICAL to the DVR-413.
Zenith DVT312	To change the region code of this DVD player you do the following: (the same hack for Zenith DVB312)
	Insert the "wrong disc". A warning saying "check region code" appears. Press Display. Press the Right Arrow on the remote control. Then press the left arrow on the remote. Press play (from the remote). Press play again (remote) and the movie will play!!!
	There are some discs that will not play using this "codes". For those discs do the following:
	Insert the "wrong disc". Press Display. Press Pause. Press 3-1-4-1-5-9-0. Press play. Press Menu.
Zenith DVT412	Method 1:
	 Power up unit with no disk in the tray After "no disc" shows on the front display, press PAUSE on the remote Press in order: 1, 4, 7, 2 on the remote (short keypresses). A new screen will show up, EEPROM settings with a green background
	Method 2:

http://cgi6.ebay.com/ws/eBayISAPI.dll?ViewSellersOtherItems&userid=best.seller_1

	http://lgregionfree.tripod.com/2005/menu1.htm
Zenith XBR411	1) Press 'setup on remote control 2) Move down to the 'lock' picture 3) Press '0000000' 4) Select region code as '0'
Zenith XBR413	With no disc loaded press SETUP Navigate to the lock icon and press "0-0-0-0". A window will appear saying Congratulations Player(Loader) Region-free To activate, press ENTER.
Zenith XBV243	1. power the player 2. press "PAUSE" 3. enter "314159" 4. press "0" (0=all regions, 1=region 1, 2=region 2, etc) 5. press "pause" 6. turn reciever off and then on again. this should work as long as u don't use the view firmware hack if u view the firmware the region code will reset and u will need to enter this hack again.
Zenith XBV342	Method 1: Put in the "wrong region" disk When it says "check region code" press DISPLAY Press PAUSE - 3 - 1 - 4 - 1 - 5 - 9 - 0 - PLAY Don't leave it too long between presses. Press MENU. The menu should appear and you're in. Method 2: The region hack for the LG 5083 works perfect on this unit, and probably any other zenith model. This is the multiregion Hack for the Zenith DVD Players. (should work on most models, tested on DVB216) Follow this instructions exactly:

Step 5

I've read not to use a 700mb capacity CD-R, but mine worked just fine! For information, I used a Memorex CD-R 700MB 24x. This speed (24x) I think is the key to success, not the capacity or size of the CD-R.

Step 6

Using the CD burning software, create a Data disc and add the directory folder RMTM0000. That's all you need!

*** When burning the disc do not use DirectCD ***

Step 7

Switch "On" your DVD player and TV and insert the newly burned disc. When prompted select "0" for multiregion and then ENTER. The unit will eject the disc and turn off by itself when you close the door. Turn it back on and your set!

Zenith XBV343	To temporarily play a Region 2 disk on a Region 1 player (on mine bought at Best Buy in US, December 2003):
	 Insert Region 2 disc Wait for "Check Region Code" alert on TV screen On remote control, hit "Display" button followed by 2, 2, 2 (doesn't have to be too fast) Press play
Zenith XBV442	This one does work on a United States purchased Zenith XBV442! Download the file FreeZoneLG6053.exe on this site:
	www.math.uga.edu/~djb/html/FreeZoneLG6053.exe
	HOW TO BURN THE CD:
	- Extract the contents of the file You will end up with a folder (FreeZoneLG6053) containing the following files: 021022_0801.bin and 021022_0801.cue - You will use these files to burn an IMAGE to CD. DO NOT just burn these files straight to CD -
	 it will be no use to you. Read on I used Nero (a cd burning program). You can probably use another program too. Choose "Burn Image to CD." This is the critical part. You will be prompted for "Image" files.
	 Navigate to the FreeZoneLG6053 folder. Choose the 021022_0801.cue file (that was the only one visible from within Nero. Burn the CD You're done.
	ON THE PLAYER:
	 Real easy Pop in the CD Choose Region Code (Choose 0 (zero) and it will play all regions) Hit "Pause" to Enter the setting you chose. You're done!
	Now watch DVDs Region Free - the way they should be!
Zenith XBV443	Method 1:
	down load from this link and burn cd

CD burning

(extract zip file and burn

- 1) File System must be "ISO9660" which is standard
- 2) Folder Structure: RMTM0000SCARLETkpjc19_1.dvd => already in this structure

How to run in DVD player

- 1) Insert CD and blue screen should come up Code "#"
- 2) "0" for code free

Enter "0" and wait 1 minute, press pause, wait one minute

3) Take out CD and Power off/on

Method 2:

Here is the process:

- 1) Download LG 6000 from http://lgregionfree.tripod.com
- 2) Extract the ZIP file, which contains a Readme file and a directory named RMTM0000
- 3) Using a CD burning program, burn the RMTM0000 directory to a CDR, making sure to use the ISO9660 file system instead of the default Joliet. Finalize the disc.
- 3) Turn on the player and insert the disc. The Region Test Menu screen should appear.
- 4) On the remote, press your desired region (or 0 for regionfree), then press Pause.
- 5) Eject the CDR and turn the player off.
- 6) Turn the player back on and enjoy.

NOTES:

- a) I did not need to wait a minute between region selection and pause.
- b) On some players this hack causes the buttons on the player itself (not the remote) to stop
